Environment Protection Licence

Licence - 20772

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Environment Protection Licence

Licence - 20772

The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

CPB CONTRACTORS PTY LIMITED
PO BOX 6120
ALEXANDRIA NSW 2015

subject to the conditions which follow.

Environment Protection Licence

Licence - 20772

1 Administrative Conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity	Fee Based Activity	Scale
Road construction	Road construction	0 - 10 km of road constructed, widened or re-routed

A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

Premises Details
WESTCONNEX NEW M5
BETWEEN BEVERLY HILLS AND ST PETERS
BEVERLY HILLS
NSW 2209
NEW M5 BETWEEN BEVERLY HILLS TO ST PETERS, INCLUDING SURFACE SITES AT KINGSGROVE NORTH, KINGSGROVE SOUTH, COMMERCIAL ROAD, BEXLEY ROAD NORTH, BEXLEY ROAD SOUTH, BEXLEY ROAD EAST, ARNCLIFFE AND ST PETERS, AS SHOWN IN MAPS REFERRED TO IN CONDITION A2.2

A2.2 In relation to Condition A2.1, the premise is defined by the most recent premise maps held on EPA Electronic File EF16/3654 and approved in writing by the EPA.

A2.3 Premise maps must be available for public access on the project website(s) no more than 3 business days after approval by the EPA.

A3 Information supplied to the EPA

A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

Environment Protection Licence

Licence - 20772

- a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Discharges to Air and Water and Applications to Land

P1 Location of monitoring/discharge points and areas

P1.1 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

P1.2 The following points referred to in the table are identified in this licence for the purposes of the monitoring and/or the setting of limits for discharges of pollutants to water from the point.

Water and land

EPA Identification no.	Type of Monitoring Point	Type of Discharge Point	Location Description
1	Surface Water discharge	Surface Water discharge	the outlet to sediment basins capturing surface water only, referred to in condition P1.3
2		Construction Water Treatment Discharge	the discharge of construction water associated with tunnelling works during construction at the Kingsgrove North, Commercial Road, Bexley Road North, Arncliffe, Canal Road sites

P1.3 The discharge point referred to in condition P1.2 are active water discharge points from sediment basins and Construction Water Treatment Plants identified in the spreadsheet titled *Temporary Sediment Basin and Construction Water Treatment Plants Discharge Point Schedule* and maintained on electronic file EF16/3654.

P1.4 The licensee must notify the EPA in writing, at least 48 hours prior to a basin or water treatment plant discharge point becoming active or inactive. The notification must include an updated *Temporary Sediment Basin and Construction Water Treatment Plant Discharge Point Schedule*. (*Sediment basins are only considered active whilst accepting water directly from active construction areas*).

P1.5 The following points referred to in the table below are identified in this licence for the purposes of weather and/or noise monitoring and/or setting limits for the emission of noise from the premises.

Environment Protection Licence

Licence - 20772

Noise/Weather

EPA identification no.	Type of monitoring point	Location description
3	Air blast overpressure & ground vibration peak particle velocity monitoring	Monitoring locations at the nearest residential properties, heritage properties and/or commercial properties as identified in section 13 of the 'Blast Management Strategy- Stage 2 M5', HP1511-3, prepared by Heilig & Partners Pty Ltd, December 2016.

3 Limit Conditions

L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Concentration limits

L2.1 For each monitoring/discharge point or utilisation area specified in the table below (by a point number), the concentration of a pollutant discharged at that point, or applied to that area, must not exceed the concentration limits specified for that pollutant in the table.

L2.2 Where a pH quality limit is specified in the table, the specified percentage of samples must be within the specified ranges.

L2.3 To avoid any doubt, this condition does not authorise the pollution of waters by any pollutant other than those specified in the table.

L2.4 Water and/or Land Concentration Limits

POINT 1

Pollutant	Units of Measure	50 Percentile concentration limit	90 Percentile concentration limit	3DGM concentration limit	100 percentile concentration limit
Oil and Grease	Visible				Not visible
pH	pH				6.5-8.5

Environment Protection Licence

Licence - 20772

Total suspended solids	milligrams per litre	50
------------------------	----------------------	----

POINT 2

Pollutant	Units of Measure	50 Percentile concentration limit	90 Percentile concentration limit	3DGM concentration limit	100 percentile concentration limit
pH	pH				6.5-8.5
Total suspended solids	milligrams per litre				50

L2.5 Exceeding the limits specified in the previous condition of this licence for pH and total suspended solids (TSS) for discharges from the sediment basins, referred to as EPA identification no. 1, identified by Conditions P1.1 and P1.2 is only permitted when the discharge occurs solely as a result of rainfall measured at the premises. The rainfall must exceed rainfall depth value for the corresponding discharge point as described in condition P1.3

L2.6 If the licensee uses turbidity (NTU) in place of TSS to determine compliance with Condition L2.4, the licensee must develop a statistical correlation which identifies the relationship between NTU and TSS for water quality from the discharge points in order to determine the NTU equivalent of 50 mg/L TSS before its use.

L2.7 The EPA may make a written request for a copy of the statistical correlation assessment and methodology to determine compliance with condition L2.4 if required.

L3 Noise limits

L3.1 All works and activities must be undertaken in a manner that will minimise noise and vibration impacts on sensitive receivers.

L3.2 The licensee must ensure that all feasible and reasonable noise and vibration mitigation and management measures are implemented during construction work authorised by this licence in accordance with the *Interim Construction Noise Guideline, Department of Environment and Climate Change* (DECC) 2009.

L4 Blasting

L4.1 At monitoring locations described in condition P1.5 the airblast overpressure level from blasting operations in or on the premises must not exceed:

- 115 dB (Lin Peak) for more than 5% of the total number of blasts during each reporting period; and
- 120 dB (Lin Peak) at any time.

Environment Protection Licence

Licence - 20772

- L4.2 At monitoring locations described in condition P1.5, the ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed;
- 10 mm/s at sensitive sites, or;
 - 25 mm/s at non-sensitive sites such as factories and commercial premises,
- in accordance with the Blast Management Strategy referred to in condition L4.4.
- L4.3 Where an agreement has been reached with affected property owners in accordance with the Infrastructure Approval, Condition D36, a maximum airblast overpressure level of 125 dB(Lin Peak) and maximum Peak Particle Velocity vibration level of 25 mm/s shall apply.
- L4.4 Blasting must be undertaken in accordance with the most recent "New M5 Blast Management Strategy", document number M5N-ES-PLN-PWD-0041, as approved in writing and held on file EF16/3654 by the EPA.
- L4.5 Prior to each blast the licensee must provide the EPA with the location details of the monitoring locations described in Condition P1.5. To remove doubt the update of the monitoring location does not need to occur where the monitoring location has already been notified to the EPA and that there are no changes.
- L4.6 Blasts must be limited to an average of one single detonation in any one day, per sensitive receiver, and a maximum of six per week per sensitive receiver, unless expressly permitted by another condition of this licence.
- This condition does not apply to blasts that are part of trial blasting.
- L4.7 To determine compliance with conditions L4.1, L4.2 and L4.3 airblast overpressure and ground vibration levels must be measured and electronically recorded for monitoring points for the parameters specified in Column 1 of the table below.

Parameter	Unit of measure
Airblast Overpressure	dB(Lin Peak)
Ground Vibration Peak Particle Velocity	mm/second

- L4.8 A maximum of two detonations may be undertaken in one day near the Arncliffe and St Peters construction site, provided that:
- (a) The detonations occur between chainages 8500 and 7500 for the Arncliffe site, and between chainages 8500 and 10895 for the St Peters site; and
 - (b) No sensitive receiver is exposed to noise and vibration impacts from more than two detonations per day; and
 - (c) No sensitive receiver is exposed to noise and vibration impacts from more than 12 detonations per week; and
 - (d) The blasting does not occur outside of the hours of:
 - (i) 7am to 6pm Monday to Friday; and
 - (ii) 8am to 1pm on Saturdays;
 - (e) No blasts are undertaken at any time on a Sunday or on a Public Holiday.
- L4.9 The operation of Condition L4.8 is subject to review by the EPA after 14 day trial period that commences on 1 December 2017.

Environment Protection Licence

Licence - 20772

L5 Hours of operation

L5.1 Unless otherwise specified by any other condition of this licence, construction work is:

- (a) restricted to between the hours of 7:00 am and 6:00 pm Monday to Friday;
- (b) restricted to between the hours of 8:00 am and 1:00 pm Saturday; and
- (c) not to be undertaken on Sundays or Public Holidays.

L5.2 Work generating high noise impact

Unless otherwise specified by any other condition of this licence, high noise impact works must only be undertaken:

- a) between the hours of 8:00am and 6:00pm Monday to Friday;
- b) between the hours of 8:00am and 1:00pm Saturday; and
- c) in continuous blocks of no more than 3 hours, with at least a 1 hour respite between each block of work generating high noise impact, where the location of the work is likely to impact the same receivers; except as expressly permitted by another condition of this licence.
For the purposes of this Condition 'continuous' includes any period during which there is less than a 1 hour respite between ceasing and recommencing any of the work the subject of this Condition.

L5.3 Condition L5.2 does not apply to high noise impact work as defined in condition E1.1 (Special Dictionary) when it is generating a predicted and validated LAeq(15 minute) noise level below the highly noise affected level at the most noise effected residences or at other sensitive land uses.

Note: A 5 dB(A) penalty should be factored into the predicted noise levels in the qualitative assessment of high impact work, as stated in Section 4.5 of the ICNG.

L5.4 Notification of works approved outside of standard construction hours

a) The licensee must notify potentially affected noise sensitive receivers of works approved outside of standard construction hours not less than 5 days and not more than 14 days before those works are to be undertaken.

b) The notification must be:

- by letterbox drop or email; and
- be detailed on the project website.

c) The notification required by paragraphs (a) and (b) of this condition must:

- clearly outline the reason that the work is required to be undertaken outside the hours specified in Condition L5.1;
- include a diagram that clearly identifies the location of the proposed works in relation to nearby cross streets and local landmarks;
- include details of relevant time restrictions that apply to the proposed works;
- clearly outline, in plain English, the location, nature, scope and duration of the proposed works;
- detail the expected noise impact of the works on noise sensitive receivers;
- clearly state how complaints may be made and additional information obtained; and
- include the number of the telephone complaints line required by Condition M7.1, an after hours contact

Environment Protection Licence

Licence - 20772

phone number specific to the works undertaken outside the hours specified in Condition L5.1, and the project website address.

Note: For the avoidance of doubt condition L5.4 does not apply to works undertaken pursuant to condition L5.7 a) or b) or condition L5.11

L5.5 The licensee may undertake works outside of standard construction hours if agreement between the licensee and a substantial majority of potentially affected sensitive receivers has been reached.

L5.6 Any agreement(s) between the licensee and the potentially affected noise sensitive receivers referred to in Condition L5.5 must be recorded in writing and a copy of the agreement(s) kept on the premises by the licensee for the duration of this licence.

L5.7 The licensee may undertake construction work out of hours if that work does not cause;

a) LAeq(15 minute) noise levels no more than 5 dB(A) above rating background level at any residence in accordance with the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009); and

b) LAeq(15 minute) noise levels no more than the noise management levels specified in Table 3 of the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009) at other sensitive receivers; and

(c) continuous or impulsive vibration values, measured at the most affected residence, greater than those for human exposure to vibration, set out for residences in Table 2.2 to the technical guideline 'Environmental Noise Management Assessing Vibration' published by the Department of Environment and Conservation in February 2006, and

(d) intermittent vibration values, measured at the most affected residence, greater than those for human exposure to vibration, set out for residences in Table 2.4 to the technical guideline 'Environmental Noise Management Assessing Vibration' published by the Department of Environment and Conservation in February 2006.

L5.8 Works Approved Outside of Standard Construction Hours

Activities and works may be undertaken outside of standard construction hours specified in L5.1 but only if one or more of the following applies:

(i) carrying on those works and activities during the hours specified in Condition L5.1 would cause unacceptable risks to one or more of the following:

(1) construction personnel safety;

(2) road user and public safety;

(3) road network operational performance as may be notified from time to time by the Roads and Maritime Services; and/or

(4) essential utility services; and/or

(ii) the TfNSW Transport Management Centre (or other road authority) refuse to issue a road occupancy licence for the works or activities during the hours specified in Condition L5.1.

(iii) Sydney Trains require a Rail Possession (involving week night and/or weekend rail shutdown) for the works or activities to be performed.

L5.9 In undertaking any works or activities under Condition L5.8 the licensee must:

Environment Protection Licence

Licence - 20772

- (i) comply with the most recent revision of the 'Manage Environment Noise Issues Procedure', that is held on file and approved in writing by the EPA; and
- (ii) implement noise and vibration mitigation detailed in the Interim Construction Noise Guidelines (DECC 2009).

L5.10 A copy of the 'Manage Environment Noise Issues Procedure' must be available for public access on the project website.

L5.11 The licensee may undertake works outside of standard construction hours if:

- (i) the delivery of oversized plant or structures has been determined by the police or other authorised authorities to require special arrangements to transport along public roads; or
- (ii) emergency work is required to avoid the loss of lives or property, or to prevent environmental harm.

L5.12 Tunnelling works may be undertaken 24 hours per day, seven days per week provided that works and mitigations are as per the description provided in M5N-ES-RPT-PWD-0011-03- Construction Noise and Vibration Impact Statement: Tunnelling.

L5.13 Tunnel Support Activities may be undertaken at Arncliffe (Kogarah Golf Course), Bexley Road (Bexley South and Bexley North work sites) and Kingsgrove tunnelling sites, 24 hours per day, seven days per week, provided that works and mitigations are as per the descriptions provided in the Construction Noise and Vibration Impact Statements for each site.

L5.14 Works associated with the permanent shafts at the Arncliffe Construction Compound may be undertaken 24 hours per day, seven days per week provided that works are undertaken in accordance with the most recent version of the Construction Noise and Vibration Impact Statement: Arncliffe Permanent Shafts Excavation, which is approved in writing and held on file by the EPA. The licensee must implement monitoring requirements and the procedure to resolve noise exceedances as detailed in this statement.

L5.15 Sydney Park Roundabout Alexandria and at Gardners Rd and Bourke Rd, Mascot

The licensee may undertake weekend works outside of standard construction hours specified in condition L5.1 at Sydney Park Roundabout, Alexandria and at Gardners Rd and Bourke Rd, Mascot. To complete works required for the installation of watermains, drainage, roundabout removal and repaving of roads and roundabout provided, the works are to be undertaken as follows:

(a) Seven weekends (Friday 6pm to Mon 6am) between the 10-August 2018 to the 31-March 2019 on Sydney Park Roundabout;

(b) Seven weekends (Friday 6pm to Mon 6am) between the 10-August 2018 to the 31-March 2019 on Gardeners Rd and Bourke Rd;

(c) The licensee must notify the EPA in writing of works undertaken under L5.15 (a or b) 7 days prior to

Environment Protection Licence

Licence - 20772

works commencing;

(d) No other works must be undertaken at the same time as the works permitted by this condition outside standard construction hours that will impact the same sensitive receivers, other than works permitted under L5.7 and L5.12;

(e) If the licensee undertakes works under this condition, the licensee must not undertake any works on a weekend period, except for those activities permitted under condition L5.7, L5.12 for two weekend periods immediately following and;

(f) High noise impact works and works causing noise levels 30dB(A) above the rating background level must not be undertaken after 6pm where reasonable and feasible.

Note: For the purposes of this condition, a weekend period is defined as 18:00 Friday through to 06:00am Monday within a seven-day period.

L5.16 Out Of Hours Works Commercial Business Interruptions

(a) Construction works may be undertaken outside of the Standard Construction Hours specified in L5.1 in order to avoid/minimise business interruption at addresses listed in L5.16 (b) provided that:

i) works are not undertaken outside the hours of:

1pm and 6pm Saturdays; and

8am and 6pm Sundays; and

6pm and 7am the following morning Monday to Friday.

ii) No other works are undertaken outside of standard construction hours on the 2 nights preceding or 2 nights following any works undertaken under L5.16 that will impact the same sensitive receivers.

(b) Construction works may be undertaken outside of the Standard Construction Hours specified in L5.1 in order to avoid/minimise business interruption at the following addresses:

- 70-80 Euston Road, Alexandria (for only up to 4 Saturdays and up to 2 Sundays)

- 67 Campbell Street, St Peters

- 63-65 Campbell Street, St Peters

- 61 Campbell Street, St Peters

- 59 Campbell Street, St Peters

- 129 Princes Hwy, St Peters

- 127 Princes Hwy, St Peters

- 90 Princes Hwy, St Peters

- 140 Princes Hwy, St Peters

- 95-101 Hutchinson Street, St Peters

- 34 Burrows Road, Alexandria

- 36 Burrows Road,

L5.17 The licensee may undertake driven piling works outside of standard construction hours specified in condition L5.1 at Gardeners Road West adjacent Bridge 8/9, over a period of four (4) weeks from 9 May 2019, subject to the following requirements:

(a) driven piling works may be carried out until 10pm Monday to Friday provided that those same works

Environment Protection Licence

Licence - 20772

commenced at 2pm on the same day,
 (b) driven piling works may be carried out between 8am and 6pm on Saturday's and Sunday's,
 (c) noise and vibration monitoring for human annoyance must be undertaken at the boundary of the nearest noise and vibration sensitive receivers that are representative of the acoustic environment, when works are predicted to cause the highest noise and vibration impacts on those receivers,
 (d) where monitoring has been carried out under Condition L5.17 (c), the EPA may request a Noise and Vibration Monitoring Report which must include the following;
 i. Numerical representation of the monitoring results of noise and vibration levels for human annoyance compared against relevant predicted levels at representative sensitive receiver locations, and
 ii. An analysis of noise and vibration levels that exceeded predicted levels, and the response from the licensee, and
 iii. A detailed description of proposed modified activities, and reasonable and feasible noise and vibration mitigation and management measures to reduce any exceedances of predicted levels, or a detailed statement justifying why no further mitigation and management measures should be implemented.

L5.18 The licensee may undertake a number of weekend works to remove existing road pavements, install roller compacted concrete & asphalt pavements and drainage lines, repave roads, and undertake line marking outside of standard construction hours specified in condition L5.1 in areas on Gardeners Road and Bourke Street identified as area 1, 2, 3 and 4, and pavement area 1, 2, and 3 drawn in the "*Construction Noise and Vibration Impact Statement: 56 hour shutdowns - Gardeners Road and Bourke Street*", dated 11 April 2019 and prepared by Renzo Tonin & Associates. The approval of these works are subject to a trial period of four (4) weeks, and to the following requirements:

- (a) the licensee may commence weekend works on Fridays at 6pm and cease those works on the following Monday at 5am,
- (b) the licensee must notify the EPA in writing of works undertaken under condition L5.18 (a) five (5) business days prior to those works commencing,
- (c) the four (4) week trial period will commence from when the licensee notifies the EPA of their intention to undertake the first weekend of works, in accordance with L5.18 (b),
- (d) the licensee must not undertake any other works at the same time as the weekend works permitted by this condition outside of standard construction hours that will impact the same sensitive receivers, other than works permitted under condition L5.7 and condition L5.12,
- (e) if the licensee undertakes weekend works under this condition, the licensee must not undertake any works except for those works permitted under condition L5.7 and condition L5.12 for two (2) nights before and after the weekend works,
- (f) high noise impact works must not be undertaken after 12am where reasonable and feasible,
- (g) the four (4) week trial period will exclude weekend works which are cancelled by inclement weather,
- (h) during the first and third weekend of works, noise and vibration monitoring for human annoyance must be undertaken at the boundary of the nearest noise and vibration sensitive receivers that are representative of the acoustic environment for each work area, when works are predicted to cause the highest noise impacts,
- (i) where monitoring has been carried out under condition L5.18 (h), the licensee must submit a Noise and Vibration Monitoring Report to the EPA five (5) business days before the expiry of the trial, and must include the following;
 - i. Numerical representation of the monitoring results of noise and vibration levels for human annoyance compared against relevant predicted noise levels, and vibration goals at representative sensitive receiver locations,
 - ii. An analysis of noise and vibration levels that exceeded predicted levels, and the response from the licensee,
 - iii. A detailed description of proposed or implemented modified activities, and reasonable and feasible noise and vibration mitigation and management measures to reduce any exceedances of predicted levels,

Environment Protection Licence

Licence - 20772

or a detailed statement justifying why no further mitigation and management measures should be implemented, and

iv. A summary of community complaints received by the licensee during the trial period.

L5.19 The licensee may undertake a number of weekend works to remove existing road pavements, install roller compacted concrete & asphalt pavements and drainage lines, repave roads, and undertake line marking outside of standard construction hours specified in condition L5.1 at the May Street and Unwins Bridge Road intersection. The approval of these works are subject to the following requirements:

(a) the licensee may commence weekend works on Fridays at 6pm and must cease those works on the following Monday at 5am,

(b) the licensee must notify the EPA in writing of works undertaken under condition L5.19 (a) five (5) business days prior to those works commencing,

(c) the licensee must not undertake any other works at the same time as the weekend works permitted by this condition outside of standard construction hours that will impact the same sensitive receivers, other than works permitted under condition L5.7 and condition L5.12,

(d) if the licensee undertakes weekend works under this condition, the licensee must not undertake any works except for those works permitted under condition L5.7 and condition L5.12 for two (2) nights before and after the weekend works,

(e) high noise impact works must not be undertaken after 12am where reasonable and feasible,

(f) representative noise monitoring must be undertaken at the boundary of the nearest noise sensitive receivers that are representative of the acoustic environment for each work area, on the first occasion for each work area when works are predicted to cause noise levels that exceed 15dB(A) above noise management levels at the nearest noise sensitive receiver locations, and on subsequent occasions when different work practices are being performed in each work area,

(g) vibration monitoring for human annoyance must be undertaken at the boundary of the nearest vibration sensitive receivers that are representative of each work area, when works are predicted to cause vibration levels to exceed vibration management levels for human comfort at the nearest sensitive receiver locations,

(h) where monitoring has been carried under condition L5.19 (f) & (g), an authorised officer of the NSW EPA may request a Noise and Vibration Monitoring Report which must include the following;

i. Numerical representation of the monitoring results of noise and vibration levels for human annoyance compared against relevant predicted noise levels, and vibration goals at representative sensitive receiver locations,

ii. An analysis of noise and vibration levels that exceeded predicted levels, and the response from the licensee,

iii. A detailed description of proposed or implemented modified activities, and reasonable and feasible noise and vibration mitigation and management measures to reduce any exceedances of predicted levels, or a detailed statement justifying why no further mitigation and management measures should be implemented.

L5.20 Works outside of standard construction hours - Respite Night Coordination

In undertaking any out-of-hours works under condition L5.8, the licensee must coordinate out-of-hours works, including those undertaken by third parties that are under the management and control of the licensee, with concurrent construction works licensed by the EPA, to achieve respite periods in locations where noise sensitive receivers are likely to be impacted by the same concurrent construction works.

For the purposes of this condition, 'respite night' means an evening and night period when;

a) a noise sensitive receiver is affected by noise levels from works less than those specified in condition L5.7, or

Environment Protection Licence

Licence - 20772

b) out-of-hours works are not occurring under condition L5.8.

L5.21 The licensee may undertake weekend works to remove existing road pavement, excavate to subgrade, prepare the subgrade by foundation treatment, place and compact the pavement layers, place asphalt and undertake line marking outside of standard construction hours specified in condition L5.1 at the Burrows Road and Campbell Road intersection. The approval of these works is subject to the following requirements:

- (a) the licensee may undertake one set of weekend works at this location (Friday 18:00 - Monday 05:00);
- (b) the licensee must notify the EPA in writing of works undertaken under L5.21(a) 5 days prior to works commencing;
- (c) the licensee must not undertake any other works at the same time as the works permitted by this condition outside of Standard Construction Hours that will impact the same sensitive receivers, other than works permitted under L5. 7 and L5.11;
- (d) if the licensee undertakes works under this condition, the licensee must not undertake any works except for those activities permitted under condition L5. 7 and L5.11 for two nights before and after the weekend works;
- (e) high noise impact works must not be undertaken after 12am where reasonable and feasible;
- (f) representative noise monitoring must be undertaken at the boundary of the nearest noise sensitive receivers that are representative of the acoustic environment, on the first occasion when works are predicted to cause noise levels that exceed 15dB(A) above noise management levels at the nearest noise sensitive receiver locations, and on subsequent occasions when different work practices are being performed;
- (g) where monitoring has been carried under condition L5.21(f), an authorised officer of the NSW EPA may request a Noise Monitoring Report which must include the following;
 - i. Numerical representation of the monitoring results of noise levels compared against relevant predicted noise levels at representative sensitive receiver locations,
 - ii. An analysis of noise levels that exceeded predicted levels, and the response from the licensee,
 - iii. A detailed description of modified activities, proposed or implemented, and reasonable and feasible noise and vibration mitigation and management measures to reduce any exceedances of predicted levels, or a detailed statement justifying why no further mitigation and management measures have been implemented.

4 Operating Conditions

O1 Activities must be carried out in a competent manner

O1.1 Licensed activities must be carried out in a competent manner.

This includes:

- a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

Environment Protection Licence

Licence - 20772

- O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:
- a) must be maintained in a proper and efficient condition; and
 - b) must be operated in a proper and efficient manner.

O3 Dust

- O3.1 The licensee must ensure that construction work is carried on by such practicable means as may be necessary to minimise dust emissions on the premises, and implement all feasible and reasonable mitigation measures to minimise the release of dust from the premises.
- O3.2 Trucks entering and leaving the premises that are carrying loads must be covered at all times, except during loading and unloading.
- O3.3 The licensee must ensure that no material, including sediment or oil, is tracked from the premises onto the surface of roads in the vicinity of the premises.

O4 Processes and management

- O4.1 The licensee must maximise the diversion of run-on waters from lands upslope and around the site whilst land disturbance activities are being undertaken.
- O4.2 The drainage from all areas that will mobilise suspended solids when stormwater runs over these areas must be controlled and diverted through appropriate erosion and sediment control measures.
- O4.3 The licensee must minimise the area of the site that is able to generate suspended material when water runs over it.
- O4.4 Erosion and sediment controls must be designed (stability, location, type and size), constructed, operated and maintained in accordance with the guideline "Managing Urban Stormwater – Soils and Construction, Volume 2D, Main road construction" DECC 2008, to be read and used in conjunction with volume 1 "Managing urban stormwater: soils and construction" Landcom 2004.
- O4.5 The licensee must ensure the design storage capacity of any sediment basin installed on the premises is reinstated within 5 days of the cessation of a rainfall event that causes runoff to occur on or from the premises.
- O4.6 The licensee must ensure that sampling point(s) for water discharged from the sediment basin(s) are provided and maintained in an appropriate condition to permit:
- a) the clear identification of each sediment basin and discharge point;
 - b) the collection of representative samples of the water discharged from the sediment basin(s); and
 - c) access to the sampling point(s) at all times by an authorised officer of the EPA.

Environment Protection Licence

Licence - 20772

- O4.7 The licensee must endeavour to maximise the reuse of captured stormwater on the premises.
- O4.8 Where sediment basins are necessary, all sediment basins and associated drainage must be installed and commissioned prior to the commencement of any clearing or grubbing works within the catchment area of the sediment basin that may cause sediment to leave the site.
Note: This condition does not apply to those works associated with the actual installation of sediment basins or associated drainage.
- O4.9 The licensee must inspect the operation of all erosion and sediment controls installed on the premises and undertake any works required to repair and/or maintain these controls:
- at least weekly during normal construction hours outlined in condition L4.1;
 - daily during periods of rainfall that causes runoff to occur ; and
 - prior to any site closure of greater than 24 hours.
- O4.10 The licensee must record all such inspections, including observations and works undertaken to repair and/or maintain soil and water management works.
- O4.11 **Community Engagement**
- The licensee must provide a Community Information Centre within the main Site Office that will be available to the community during business hours. The Community Information Centre must provide images and relevant information on the project and be staffed by a Community Liaison Team member to provide answers to any community concerns/enquiries.
 - The community information display must include details of upcoming construction activities (including out of hours activities), nature and timing of such activities and relevant contact details. The information must include at a minimum, details of up and coming activities that are to occur over the next month.
 - The licensee must convene and hold community meetings or open forums in relation to the project, including (but not limited to) key construction activities and/or key project milestones, at least once every three months.
 - The licensee must keep minutes of any community meeting held in accordance with this condition and must submit a copy of the relevant minutes to the EPA when requested by an EPA officer.

5 Monitoring and Recording Conditions

M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.
- M1.2 All records required to be kept by this licence must be:
- in a legible form, or in a form that can readily be reduced to a legible form;
 - kept for at least 4 years after the monitoring or event to which they relate took place; and

Environment Protection Licence

Licence - 20772

c) produced in a legible form to any authorised officer of the EPA who asks to see them.

M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:

- a) the date(s) on which the sample was taken;
- b) the time(s) at which the sample was collected;
- c) the point at which the sample was taken; and
- d) the name of the person who collected the sample.

M2 Requirement to monitor concentration of pollutants discharged

M2.1 For each monitoring/discharge point or utilisation area specified below (by a point number), the licensee must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The licensee must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

M2.2 Water and/ or Land Monitoring Requirements

POINT 1

Pollutant	Units of measure	Frequency	Sampling Method
Oil and Grease	Visible	Special Frequency 1	Visual Inspection
pH	pH	Special Frequency 1	Probe
Total suspended solids	milligrams per litre	Special Frequency 1	Grab sample

POINT 2

Pollutant	Units of measure	Frequency	Sampling Method
pH	pH	Daily during any discharge	Probe
Total suspended solids	milligrams per litre	Daily during any discharge	Grab sample

M2.3 For the purposes of condition M2.2 and the Table thereto 'Special Frequency 1' means:

- (a) less than 24 hours prior to a controlled discharge and daily for any continued controlled discharge; and
- (b) when rainfall causes a discharge from a basin which has not been emptied within 5 days of the cessation of a rainfall event.

M3 Testing methods - concentration limits

M3.1 Subject to any express provision to the contrary in this licence, monitoring for the concentration of a

Environment Protection Licence

Licence - 20772

pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

M4 Environmental monitoring

- M4.1 Noise monitoring must be carried out in accordance with Australian Standard AS 2659.1 – 1998: Guide to the use of sound measuring equipment – Portable sound level meters, and the compliance monitoring guidance provided in the NSW Industrial Noise Policy.
- M4.2 Vibration monitoring must be carried out in accordance with the guidance provided in the Environmental Noise Management Assessing Vibration: A Technical Guideline, published by the Department of Environment and Conservation, February 2006.
- M4.3 The licensee must undertake noise and vibration monitoring as directed by an authorised officer of the EPA.

M5 Weather monitoring

- M5.1 Rainfall at the premises must be measured and recorded in millimetres per 24 hour period at the same time each day from the time that the site office associated with the activities permitted by this licence is established.

M6 Recording of pollution complaints

- M6.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.
- M6.2 The record must include details of the following:
 - a) the date and time of the complaint;
 - b) the method by which the complaint was made;
 - c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
 - d) the nature of the complaint;
 - e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
 - f) if no action was taken by the licensee, the reasons why no action was taken.
- M6.3 The record of a complaint must be kept for at least 4 years after the complaint was made.
- M6.4 The record must be produced to any authorised officer of the EPA who asks to see them.

Environment Protection Licence

Licence - 20772

M6.5 Daily Complaints Reports

- a) The licensee must submit, by 2:00 pm each business day, a report to the EPA that provides details of all complaints received in relation to construction activities regulated by the licence on the telephone complaints line required by Condition M6.1. The licensee is not required to submit a report on a Saturday, Sunday or public holiday until not later than 2:00 pm on the following weekday that is not a public holiday. The licensee is not required to submit a report for any daily reporting period during which no complaints were received.
- b) The report must:
- (i) be submitted to the email address nominated from time to time by the EPA;
 - (ii) include a unique identifier number for each complaint;
 - (iii) the details required by condition M6.2;
 - (iv) include the date and time, as reported by the complainant, of the event the subject of the complaint;
 - (v) include an outline of the work or activity the subject of the complaint; and
 - (vi) include the complaints received between 12.00 pm on that day and 12.00pm on the previous business day.

M7 Telephone complaints line

- M7.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.
- M7.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.
- M7.3 The preceding two conditions do not apply until - the date of the issue of this licence.

M7.4 Noise and Vibration Complaints

- a) The licensee must investigate noise and vibration complaints received via the telephone complaints line from the occupants of dwellings or the management of noise sensitive receivers other than dwellings:
- (i) within two hours of the complaint being made; or
 - (ii) in accordance with any prior complaint management agreement the licensee may have made with the complainant.

Environment Protection Licence

Licence - 20772

6 Reporting Conditions

R1 Annual return documents

R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

1. a Statement of Compliance,
2. a Monitoring and Complaints Summary,
3. a Statement of Compliance - Licence Conditions,
4. a Statement of Compliance - Load based Fee,
5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan,
6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and
7. a Statement of Compliance - Environmental Management Systems and Practices.

At the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

R1.3 Where this licence is transferred from the licensee to a new licensee:

- a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:

- a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

R1.5 The Annual Return for the reporting period must be supplied to the EPA via eConnect *EPA* or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.

R1.7 Within the Annual Return, the Statements of Compliance must be certified and the Monitoring and

Environment Protection Licence

Licence - 20772

Complaints Summary must be signed by:

- a) the licence holder; or
- b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

R2 Notification of environmental harm

R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

R3 Written report

R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:

- a) where this licence applies to premises, an event has occurred at the premises; or
- b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence, and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.

R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.

R3.3 The request may require a report which includes any or all of the following information:

- a) the cause, time and duration of the event;
- b) the type, volume and concentration of every pollutant discharged as a result of the event;
- c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
- d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
- e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
- f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
- g) any other relevant matters.

R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

Environment Protection Licence

Licence - 20772

R4 Other reporting conditions

R4.1 Noise and Vibration Reports

a) Upon request of an authorised officer of the EPA, the licensee must submit a Preliminary Investigation Report to the EPA in respect of any noise or vibration monitoring undertaken in accordance with the requirements of Condition M7.4.

b) The Preliminary Investigation Report must be submitted to the EPA by 4.30 pm of the afternoon of the next working day following any noise or vibration monitoring.

c) The Preliminary Investigation Report must:

(i) include numerical and/or graphical representation of the noise and vibration monitoring results; and

(ii) highlight any detected exceedance of noise goals or limits specified in:

(1) this licence;

(2) relevant noise guidelines; and

(3) relevant noise modelling.

d) In the event of any exceedance of the noise goals or limits referred to in Condition R4.2 c)(ii), the licensee must:

(i) modify work practices and methods and implement all practicable and reasonable measures to prevent a recurrence of the exceedance; and

(ii) submit a Follow-up Investigation Report to the EPA within 5 working days of any noise or vibration monitoring having been undertaken (unless otherwise approved by the EPA).

e) the Follow-up Investigation Report must include:

(i) confirmation of whether noise monitoring has been undertaken in accordance with AS2659 and the compliance monitoring guidance provided in the INP;

(ii) confirmation of whether vibration monitoring has been undertaken in accordance with the guidance provided in the Assessing vibration: a technical guideline (DEC, 2006);

(iii) details of the prevailing meteorological conditions during the period when the noise or vibration monitoring was undertaken;

(iv) a map of each noise and vibration monitoring location in relation to the noise source, including relevant distances;

(v) numerical and graphical representation of the noise and vibration monitoring results;

(vi) an analysis of the noise and vibration monitoring results;

Environment Protection Licence

Licence - 20772

(vii) details of any remedial action taken in relation to the matter; and

(viii) in cases not the subject of remedial action, detailed justification of the decision not to undertake remedial action.

7 General Conditions

G1 Copy of licence kept at the premises or plant

G1.1 A copy of this licence must be kept at the premises to which the licence applies.

G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.

G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

G2 Contact number for incidents and responsible employees

G2.1 The licensee must provide the EPA with up to date contact details to enable the EPA:

(a) to contact either the licensee or a representative of the licensee who can respond at all times to incidents relating to the premises, and

(b) to contact the licensee's senior employees or agents authorised at all times to:

(i) speak on behalf of the licensee, and

(ii) provide any information or document required under licence.

G2.2 The contact details required by Condition G2.1 above must include:

a) the full name and title of the authorised representatives and the scope of their respective authorisations; and

b) the direct telephone number, mobile number, pager number, fax number, email address and postal address for contacting each authorised representative.

8 Special Conditions

Environment Protection Licence

Licence - 20772

E1 Special Dictionary

E1.1 Special Dictionary

Term	Meaning
High Noise Impact Works	grinding metal, concrete or masonry, rock drilling, line drilling, smooth drum vibratory rolling, bitumen milling and profiling, jackhammering, rock hammering or rock breaking, impact piling and other work occurring on surfaces that generates noise with impulsive, intermittent, tonal or low frequency characteristics
Project Website	means a website that is under the control of the licensee and which is easily available for viewing by the community
Background Noise Level	means the overall single figure background noise level for each assessment period. Determination of the rating background level is by the method described in the NSW Industrial Noise Policy (EPA 2000)
Rating Background Level	means the overall single figure background noise level for each assessment period. Determination of the rating background level is by the method described in the NSW Industrial Noise Policy (EPA 2000)
Potentially affected noise sensitive receivers	means identifying residences or sensitive land users that may be affected by noise from the construction project under this licence
Noise Catchment Area	means groups of sensitive receivers that are similarly affected by noise from the construction works

Environment Protection Licence

Licence - 20772

Dictionary

General Dictionary

3DGM [in relation to a concentration limit]	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
AM	Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
annual return	Is defined in R1.1
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
BOD	Means biochemical oxygen demand
CEM	Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means Environment Protection Authority of New South Wales.
fee-based activity classification	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2009.
general solid waste (non-putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997

Environment Protection Licence

Licence - 20772

flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
general solid waste (putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
grab sample	Means a single sample taken at a point at a single time
hazardous waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
licensee	Means the licence holder described at the front of this licence
load calculation protocol	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
local authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
material harm	Has the same meaning as in section 147 Protection of the Environment Operations Act 1997
MBAS	Means methylene blue active substances
Minister	Means the Minister administering the Protection of the Environment Operations Act 1997
mobile plant	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
motor vehicle	Has the same meaning as in the Protection of the Environment Operations Act 1997
O&G	Means oil and grease
percentile [in relation to a concentration limit of a sample]	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
plant	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
pollution of waters [or water pollution]	Has the same meaning as in the Protection of the Environment Operations Act 1997
premises	Means the premises described in condition A2.1
public authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
regional office	Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence
reporting period	For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
restricted solid waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
scheduled activity	Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997
special waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
TM	Together with a number, means a test method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .

Environment Protection Licence

Licence - 20772

TSP	Means total suspended particles
TSS	Means total suspended solids
Type 1 substance	Means the elements antimony, arsenic, cadmium, lead or mercury or any compound containing one or more of those elements
Type 2 substance	Means the elements beryllium, chromium, cobalt, manganese, nickel, selenium, tin or vanadium or any compound containing one or more of those elements
utilisation area	Means any area shown as a utilisation area on a map submitted with the application for this licence
waste	Has the same meaning as in the Protection of the Environment Operations Act 1997
waste type	Means liquid, restricted solid waste, general solid waste (putrescible), general solid waste (non - putrescible), special waste or hazardous waste
