

Rozelle Interchange

WestConnex

Upcoming work in your area – Intelligent Transport Systems (ITS)

October 2020

The Rozelle Interchange is a new underground interchange connecting the New M4 and M8 tunnels with City West Link and the future Western Harbour Tunnels, as well as providing an underground bypass of Victoria Road between Iron Cove Bridge and ANZAC Bridge.

As part of the new tunnel network, we need to install ITS (or Intelligent Transport Systems) near and on Victoria Road to assist motorists who are travelling towards the tunnel portal in Rozelle.

ITS includes changeable message signs (CMS), electronic message signs (EMS), traffic signals, Closed Circuit Televisions (CCTV), speed cameras and over-height detection systems. ITS help motorists to make safer, more coordinated decisions on their journey and are a mandatory part of any new road.

What's happening

We'll be installing several pieces of ITS infrastructure in your area with the exact types and locations provided over the page. This work is due to start early 2021 and will be ongoing for several months.

Work to install ITS will involve:

Extensive day work. Some day-time activities may create high noise and vibrations for nearby residents.

Some night work up to three nights per week as we're near a busy road (Victoria Road). This work will generally take place between **7pm and 6am Monday to Friday**.

More information regarding the full scope and dates of this work will be available soon in an **information pack** to residents. **Please subscribe to our e-updates** for specific details about work in your area by emailing info@rozelleinterchange.com.au with your property address.

If you have any questions about this work or the infrastructure being installed, please feel free to get in touch via the details provided to the right.

This work will begin in early 2021 and will be ongoing for several months

Notification no. 192

ITS infrastructure on Victoria Road near Robert Street

These cantilevered directional signs are approximately **10m tall** and **10m wide**.

These Electronic Messaging Signs are approximately **1m in height** and **0.8m wide**. The signs are mounted on a pole which is **7m tall**.

Other smaller **ITS infrastructure** will be installed including roadside cabinets, over height detectors, and a CCTV camera.

We're going **digital**.

After **three** paper notifications, we'll be communicating with you via **email**.

Once you send your email address to info@rozelleinterchange.com.au we'll be able to send you more **detailed information** about this work.

Further detailed information will be available soon, regarding the:

- **scope and timing** of ITS work near Robert Street
- the **design process** and how we've limited the impact to you
- **impacts** to nearby residents
- **traffic changes** associated with this work

Please subscribe to our e-updates to receive these details by emailing info@rozelleinterchange.com.au with your property address.
