

## Night work to remove temporary barriers in M8 on-ramps

From 6 December 2021, night work will be undertaken to remove temporary concrete barriers along the western verge of the M8 on-ramp near Euston Road, St Peters.

### What we're doing

Work to remove temporary concrete barriers will be undertaken on Monday 6 December and will take one (1) night shift to complete.

Due to the high volume of traffic during the day, this work will be done at night between 10.00pm and 5.00am in line with a planned maintenance shutdown of the M8 to ensure the safety of pedestrians, motorists, and workers.

Equipment required for this work includes, but is not limited to, delivery vehicles, mobile cranes and hand tools.

### How this affects you

This work is expected to have some noise impacts on nearby residents and the Project is committed to minimising construction noise to surrounding residents and businesses by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use, directing noisy equipment away from residences, where possible and installing noise blankets around temporary work areas.

During the work, temporary parking, traffic and pedestrian changes will be required including traffic control and directional signage.

### When

From Monday 6 December 2021

### Hours of operation

10.00pm - 5.00am

### Where

Western verge of the M8 on-ramp
