

Short term change to standard construction hours

Work notification | 25 August 2020

Work on Sundays to maintain social distancing

We're writing to let you know about some changes to our standard work hours for the next few weeks.

In response to the rapidly changing situation regarding the COVID-19 (Coronavirus) pandemic and in line with health advice released by the NSW Government, the Rozelle Interchange Project will be carrying out some construction activities between 8am and 6pm on Sunday 30 August and Sunday 6 September 2020.

This notification outlines the work we will be doing and why this is required to be done on a Sunday. Further information about this work will be included in our weekly email updates.

Why is this change necessary?

The health and safety of the community, our stakeholders and our workers is our number one priority and we want to ensure that we are doing all that we can to minimise the risk of transmission and unnecessary exposure to COVID-19.

Working on a Sunday allows us to reduce the number of people working in close proximity at the same time because we can spread the work over more days. By doing this we're able to ensure that appropriate social distancing protocols are followed with less people working in the same area.

About the work

Work on Sundays is expected to take place in two locations on The Crescent (corner of Chapman Road) and Victoria Road, as indicated in the maps overleaf. Our activities in these locations may include:

- installation of new stormwater drainage pipes and pits
- installation of new signage and road furniture
- road and footpath construction and tie-in work
- building retaining walls

Work to install new signage and road furniture may also be required in areas on City West Link, The Crescent, Chapman Road and Johnston Street.

A temporary work site and traffic control will be in place when we are working. We may not work in both locations at the same time and this work is not expected to generate high impact noise. Equipment used for this work may include vacuum trucks, excavators, loader cranes, road compactors and hand tools.

We'll make every effort to minimise noise associated with this work by turning off equipment when not in use and installing temporary noise blankets around our temporary work sites.
