

Concrete pour - Campbell Road Civil and Tunnel Site

The M4-M5 Link Tunnels project will carry out several large continuous concrete pours at the Campbell Road Civil and Tunnel Site over the coming months.

What we're doing

As part of the construction of the Campbell Road Ventilation Facility several large concrete pours will be undertaken over the coming months. To ensure the strength and durability of the concrete, each pour must be undertaken as one continuous activity. Due to the size of several of the concrete pours, they will extend outside the standard construction hours.

The next concrete pour will occur between 2.30am and 10.00pm Monday, 26 October 2020. Tuesday, 27 October and Wednesday, 28 October will be used as contingency dates in the event the pour can't go ahead as planned on Monday, 26 October 2020.

Equipment required for this work includes, but is not limited to; concrete trucks, pumps and vibrators, as well as hand tools and lighting towers.

How this affects you

This work may have some noise impacts on nearby residents. The Project is committed to minimising construction noise to surrounding residents and businesses by turning off equipment and vehicles when not in use, directing noisy equipment away from residences, and where possible installing noise blankets and barriers around temporary work areas and completing noisy work early in the night where possible.

Impacted residents will be notified specifically prior to each planned concrete pour.

Temporary lighting is required for these works. The project will minimise the impact from any temporary lighting by directing lights away from residents.

When

Monday, 26 October 2020

Contingency:

Tuesday, 27 October and

Wednesday, 28 October

Hours of operation

2.30am - 10.00pm

Tunnelling - 24 hours a day,
seven days a week
