

Construction factsheet

Hours of work

- Day work will be ongoing within our construction sites and in local streets during standard construction hours from 7am to 6pm Monday to Friday and 8am to 6pm on Saturdays.
- Due to COVID-19 restrictions we are approved to undertake day work between 8am and 6pm on Sundays to allow for social distancing to be observed.
- High noise work (rock hammering or saw cutting) will be carried out for three hours at a time before an hour respite is provided. High noise work will finish at 1pm on Saturdays. Please note that some lower impact activities such as bored piling, can be carried out until 6pm on Saturdays.
- Work that is not intrusive may be completed outside standard construction hours without notification. These activities may include security checks, oversized deliveries and other lower impact activities.
- Tunnelling and tunnel support activities such as loading ground material into trucks and working inside the tunnel sheds, may happen 24/7.
- Night work is scheduled when traffic volumes are too high during the daytime and we don't have approval to work on the road. This typically applies to construction work on Victoria Road, City West Link and The Crescent. Night work can take place between 7pm and 6am Monday to Friday.

Equipment used

Equipment used for our work (day and night) includes but is not limited to: excavators, rock hammers, jack hammers, line marking removal machines, line marking machines, road saws, vacuum trucks, hand tools, compactors, concrete trucks, light vehicles, cranes, piling rigs, asphaltting machines and generators.

How we're mitigating impacts on Rozelle, Lilyfield and Annandale residents

Construction work may be impactful to those living nearby. We're trying to limit the impact by:

- changing our construction methodology to reduce the overall duration of high impact activities such as rock hammering, where possible
- scheduling work to happen during the day instead of at night, where possible installing noise blankets around our temporary work sites
- adhering to the respite breaks during high impact activities (one hour break every three hours)
- using water suppression such as hoses, misters and sprinklers to limit the creation of dust during some activities.
