

### Monitoring equipment installation: Goodsell Street, St Peters

The Project recently completed tunnel excavation below St Peters and Newtown. A groundwater monitoring device will now be installed below Goodsell Street in St Peters.

#### What we're doing

From Monday, 28 June 2021, work to install a groundwater monitor will be carried out between 7:00am and 6:00pm Monday to Friday and 8:00am to 1:00pm on Saturdays for up to two weeks, weather permitting.

Work will be undertaken on Goodsell Street near Council Street, St Peters.

Some on street parking will be temporarily removed to allow this work to be completed.

This work will involve:

- Identifying underground services and utilities
- Setting up a safe work area with site specific environmental controls
- Traffic and pedestrian management to ensure the safety of motorists, residents and workers
- Setting up a drill rig mounted on the back of a truck or we may use a track mounted drill rig
- Drilling a small diameter borehole 50 metres into the ground pit
- Installing the groundwater monitor
- Covering the top of the hole with a steel cap and from time to time the project team will access the hole to measure groundwater.

Equipment required for this work includes, but is not limited to; concrete saw, jack-hammer, drilling equipment, vacuum truck, compactor, tipper truck, concrete truck, traffic control (including traffic control vehicles) and other light vehicles.

#### How this affects you

At times, this work will be noisy. The Project is committed to minimising construction impacts on surrounding residents by:

- Consulting with directly affected residents ahead of the work taking place

#### When

From Monday 28 June 2021 for up to two weeks.

#### Hours of operation

7:00am - 6:00pm Monday to Friday and 8:00am - 1:00pm on Saturday

#### Where

Goodsell Street, St Peters
