

Night work to replace axial fan within Underwood Road Ventilation Facility

Work is required to replace an axial fan within the Underwood Road Ventilation Facility located along Underwood Road, adjacent to the M4 Motorway, see map overleaf for location of work.

What we're doing

Due to the proximity of the project work to live traffic, road closures must be in place to ensure the safety of the public and workers. The closure is required to occur outside of standard construction hours.

Work to replace an axial fan within the Underwood Road Ventilation Facility is scheduled to take place between 9:00pm and 4:00am on Tuesday, 16 November and Wednesday, 17 November 2021, weather and site conditions permitting.

The work will involve:

- setting up traffic control
- removing the building façade
- removing the fan using a 150-tonne crane from inside the building and loading the fan onto a truck for removal offsite.

Equipment required for this work includes, but is not limited to, 150-tonne crane, traffic control vehicle and lighting towers.

How this affects you

There will be some noise associated with this work, however every effort will be made to minimise the impact of work, including turning off equipment and vehicles when not in use, instructing workers to keep noise to a minimum and, where possible, directing noisy equipment away from residences.

Traffic changes

There will be a temporary single lane closure along a small section of Underwood Road, Homebush. Detours will be in place and access for residents will be maintained. If you travel along the work route, please allow extra travel time and follow the signage and direction of traffic controllers.

When

Tuesday, 16 November and
Wednesday, 17 November
2021

Hours of construction

9:00pm to 4:00am

Where

Underwood Road
Ventilation Facility,
