

Night work to replace axial fan within Underwood Road Ventilation Facility

Work is required to replace an axial fan within the Underwood Road Ventilation Facility located along Underwood Road, adjacent to the M4 Motorway, see map overleaf for location of work.

What we're doing

Due to the proximity of the project works to live traffic, road closures must be in place to ensure the safety of the public and workers. The closure is required to occur outside of standard construction hours.

Work to replace an axial fan within the Underwood Road Ventilation Facility is scheduled to take place between 10:00pm and 4:00am on Tuesday, 12 January and Wednesday, 13 January 2021, weather and site conditions permitting.

The work will involve:

- Setting up traffic control
- Removal of building façade
- Removal of fan utilising a mobile crane from the building and loading of the fan onto a truck for removal offsite.

Equipment required for this work includes, but is not limited to, scissor lift, franna crane, truck and light vehicles.

How this affects you

There will be some noise associated with this work, however every effort will be made to minimise the impact of work, including turning off equipment and vehicles when not in use, instructing workers to keep noise to a minimum and, where possible, directing noisy equipment away from residences.

Traffic changes

There will be a temporary east and westbound closure of the M4 Motorway between Concord Road and Homebush Bay Drive. Detours will be in place. If you travel along the work route, please allow extra travel time and follow the signage and direction of traffic controllers.

The New M4 Tunnels will remain open to traffic in both east and westbound directions. Please also ensure to check live traffic for the latest updates.

When

Tuesday, 12 January and
Wednesday, 13 January
2021

Hours of construction

10:00pm to 4:00am

Where

Underwood Road
Ventilation Facility,
Homebush
