

21 June 2016

Installation of height warning marker, barriers and signage

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the M4 is being widened between Parramatta and Homebush from three to four lanes in each direction, alleviating congestion. Visit westconnex.com.au/M4Widening for more information.

During construction of the elevated roadway over the James Ruse Drive westbound on ramp, temporary height restrictions will be in place for at least eight weeks.

On **Sunday, 26 June 2016**, night work will commence to install temporary signage, temporary barriers and a temporary height warning marker along James Ruse Drive. A map of the work area is provided overleaf.

This work is expected to take **three nights** to complete, weather permitting. To ensure the safety of workers and motorists, the work will take place between **10.00 pm and 6.00 am**.

During the work, two southbound lanes of James Ruse Drive will be closed to traffic. Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. If you travel along the work route, please allow extra travel time and follow the direction of traffic controllers and signage.

Equipment used during the work will include cranes, elevated work platforms, power tools, trucks and lighting towers.

Some of this work may be noisy, however every effort will be made to minimise the impact of work, including by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you would like further information about the upcoming work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 Widening team or email community.info@rcpbjv.com.au.

Notification Reference: N070

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
