WestConnex M4-M5 Link utilities investigations – Rozelle

Dear Resident

Work is underway on WestConnex, which involves widening and extending the M4 motorway, duplicating the M5 motorway and joining the M4 and M5 to create a free-flowing motorway network.

Planning has started for the proposed M4-M5 Link – the third stage of the WestConnex project linking the M4 at Haberfield to the M5 at St Peters via underground tunnels. For more information on the M4-M5 Link, visit westconnex.com.au/M4-M5Link.

Further to our notification of 19 September 2016, utilities investigations will be continuing in the Rozelle Rail Yards, around Easton Park and nearby local streets, during late October 2016, weather permitting. These investigations are progressive and should only take a day or two in each street.

The investigations involve locating and inspecting the existing electricity, gas, telecommunications and sewer infrastructure and are not expected to have noise impacts.

Utilities investigations are an important part of the design phase for the M4-M5 Link. The findings from the investigations will be used to determine the location of existing utilities infrastructure and help design the project.

Most of these investigations will take place in public areas such as roads, with each site selected to minimise inconvenience to road users and pedestrians, where possible.

To minimise the impact on nearby residents, investigations will generally be undertaken **between 7.00 am to 6.00 pm from Monday to Friday and 8.00 am to 1.00 pm on Saturday**. Some investigations may be conducted outside of these hours to ensure the safety of workers and motorists, and you will be notified if out of hours' work is required near your property.

If access to privately-owned land is required, individual property owners will be contacted in advance for their approval.

Traffic control arrangements will be put in place if the work is taking place near a road or pedestrian or cycle path. At the completion of work, all sites will be restored to their original condition.

If you would like further information, please call 1800 660 248 and ask to speak with a member of the M4-M5 Link project team or email info@westconnex.com.au.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
