

## Northcote and Wattle Street tunnelling and civil sites - upcoming night work schedule

Night work will intermittently be undertaken as part of site establishment activities between the months of March and May 2019. The work will involve placing new line marking along Wattle Street and delivering oversized equipment to both Northcote and Wattle Street sites. See the schedule of night work and map overleaf.

### What we're doing:

Due to the high volume of traffic during the daytime, some work will be scheduled out of hours to ensure the safety of pedestrians, motorists and workers. The M4-M5 Link Tunnel team is working closely with the M4 East team to ensure cumulative impact does not occur in the area and respite is maintained throughout the works for both projects.

Work will occur for a maximum of two nights in a row at one location, no more than three nights per week and no more than ten nights per calendar month in total.

This notice provides residents with a high-level schedule of upcoming night work. Additional notification will be provided to residents prior to work occurring with specific construction hours of operation and dates.

If you have any feedback about this proposed work, please contact us via the toll free 1800 660248 number or email [info@m4-m5linktunnels.com.au](mailto:info@m4-m5linktunnels.com.au)

The work will generally involve:

- Setting up traffic and pedestrian management controls
- Delivery of oversized equipment to Northcote and Wattle Street sites
- Setting up a mobile crane within both the sites to assist with the assembly of the oversized equipment
- Closing two traffic lanes (eastbound and westbound) on Wattle Street to place new line-marking
- Installing traffic signage along Wattle Street

### When

Between March 2019 and May 2019

### Hours of operation

6.00pm - 7.00am Monday to Friday (inclusive). Specific hours to be confirmed closer to the work

### Where

Northcote and Wattle Street sites, Haberfield

**BUILDING OUR FUTURE**

Equipment required for this work includes, but is not limited to; line-marking vehicles, vacuum trucks, oversized trucks, a mobile crane, hand tools, water carts, lighting towers, elevated work platforms, trucks, traffic control and light vehicles.

### How this affects you

Some of these activities will be noisy. The Project is committed to mitigating construction impacts to surrounding residents by:

- Scheduling high-impact noise activities as early as possible
- Using non-tonal reversing beepers and instructing workers to keep noise to a minimum
- Directing temporary lighting away from properties
- Consultation with directly impacted residents ahead of the work taking place

### Traffic changes

Temporary changes to traffic and pedestrian routes around the work sites will be required while night work is taking place. Traffic control and signage will be in place to assist motorists, pedestrians and cyclists through these changes.

### Schedule of upcoming night work

Activity	Noise impact	March	April	May
Line marking	Medium noise	3 nights		
Delivery of oversized equipment	Medium noise	6 nights	6 nights	6 nights

### Northcote and Wattle Street tunnelling and civil sites

Northcote tunnel and civil sites		Line marking	
Wattle Street tunnel and civil site		Oversized delivery
