Pyrmont Bridge Road site – update to trenching work

Work is underway at the Pyrmont Bridge Road site to prepare for tunnelling to start. As previously notified (MT076), part of this work includes installing a high voltage power supply to the site to provide electricity for tunnelling activities. Trenching will take place on footpaths and in the roadway, connecting to an existing substation on Layton Street in Camperdown.

What we're doing

Work will start from Monday 3 June 2019 and will take approximately one month to complete, weather permitting. Hours of work will vary depending on the location of work. Further information will be provided to impacted residents and businesses about upcoming changes, as the work progresses.

Workers will be accessing existing electrical pits as well as trenching along a section of the high voltage route as shown in the map over the page. Access to properties will be maintained at all times.

The work will involve:

- Establishing traffic control and signage as required
- Investigating the location of existing underground services
- Accessing existing electrical pits at multiple locations. This involves excavating a trench to a depth of approximately 1.5 metres and installing structural support
- Installing new power conduits and pulling cable through
- Backfilling and reinstating the ground with asphalt.

Equipment needed for this activity includes, but is not limited to vacuum trucks, compactors, excavators, saw cutters, generator, hand tools, traffic control and light vehicles. There are no planned power outages for this work.

How this affects you

This work will generate some noise, particularly when trenching is taking place. The Project is committed to minimising construction impacts by:

When
From Monday 3 June 2019 for one month

Hours of operation
Between the hours of:
7.00am - 6.00pm Monday to Friday
8.00am - 6.00pm Saturday

Where
Mallett Street, Annandale and Mason Street, Camperdown

If you have an enquiry, complaint or you want to provide feedback about this work, please contact the M4-M5 Link Tunnels team on toll free 1800 660 248 or, email info@m4-m5linktunnels.com.au

Notification No. MT076A
• Consulting with directly affected residents and businesses prior and during the work
• Observing respite periods during high noise construction activities
• Scheduling work to occur during daytime hours instead of at night. The work will result in daytime traffic impacts.

Traffic changes
Traffic conditions will change depending on the location of work. **Businesses and residents will be notified in advance of any traffic changes that may impact them directly.** Signage and traffic control will be in place to direct motorists and pedestrians through traffic changes as a result of the work.

**Map of upcoming trenching work**
