

Arncliffe

Welcome to the February construction update for Arncliffe as part of the WestConnex New M5 project.

Construction at the Arncliffe site is now well underway. A roadheader has now started digging a construction access tunnel which will pass under the existing M5 Motorway so that mainline tunnelling can start later this year.

Tunnelling for the New M5 project will occur 24 hours per day, seven days per week.

During December and January, the project team completed installed temporary noise walls along Marsh Street and commissioned the water treatment plant located near the spoil shed. The plant will remove contaminants from water during the tunnelling activities.

Work continues to install spoil sheds and set-up plant, equipment and workshops. Concrete pouring, decline excavation and geotechnical drilling to support tunnelling is also continuing.

Temporary traffic changes

Temporary traffic changes will be required to safely complete some activities, including road and lane closures, footpath closures and detours, reduced speed limits and temporary removal of street parking.

Traffic control and signage will be in place to guide motorists, pedestrians and cyclists through any changed traffic conditions.

Upcoming activities

Work being carried out at the Arncliffe construction site throughout February includes:

- ongoing geotechnical drilling to support tunnelling
- continuing installation of temporary noise walls along the golf course
- ongoing access road and car park construction including ground compaction and concrete pouring
- Digging a construction access tunnel to prepare for mainline tunnelling towards Bexley
- continuing 24 hour excavation of the tunnel decline in preparation for tunnelling towards Tempe
- continuing spoil shed construction.

Plant and equipment used during these works will include vehicles, hand tools, lighting towers, generators, excavation and boring equipment, cranes, compressors roadheaders and pumps.

Every effort will be made to minimise the impact of work on nearby residents and businesses.

Work hours

Surface construction activities for the New M5 project will generally be carried out during standard construction hours **between 7am and 6pm Monday to Friday and 8am and 1pm on Saturday**.

Limited low-impact construction activities will continue outside of these hours and include:

- tunnel excavation
- installing steel beams and concreting to support the decline tunnel
- stockpiling spoil within the site compound
- Assembling and concreting shaft walls
- delivering plant and equipment to site.

These activities are generally inaudible. Tunnelling will occur 24 hours per day, seven days per week. You will be provided with further notification prior to tunnelling taking place in the vicinity of your property.

For more information

If you have any questions about this work, please call toll free **1800 660 248** and ask to speak to a member of the New M5 community engagement team.

Alternatively, you can visit the Community Information Centre opened at **27 Burrows Road, St Peters**. The centre is open on Monday to Friday from 9am to 5pm.
