Site establishment work - Rozelle Rail Yards and Victoria Road Rozelle

We are writing to let you know about upcoming work in your local area for the Rozelle Interchange. This work is to establish the sites and equipment we will need to construct the project. As the project progresses the site set-up will change to accommodate the different construction activities for each stage of work. We will continue to update you about these changes as the work progresses.

The Rozelle Interchange is a new underground motorway interchange which provides connectivity to the M4-M5 Link Tunnels and the City West Link, and an underground bypass of Victoria Road between Iron Cove Bridge and Anzac Bridge. A connection to the future Western Harbour Tunnel will also be established.

The interchange in Rozelle will be mostly underground and located at the site of the old Rozelle Rail Yards. It will deliver new cycling and pedestrian routes in Rozelle and transform the disused site into up to 10 hectares of new open space.

What we’re doing
Work will start in the coming weeks to establish construction sites in the Rozelle Rail Yards and along Victoria Road between Lilyfield Road and Quirk Street Rozelle. This work is expected to take around six months, weather permitting. A map showing the location of the work is provided overleaf. Specific activities will include:

- Installation of site fencing, hoarding, scaffolding, retaining walls, access points and traffic barriers
- Utility installation, disconnections and protections
- Geotechnical investigations inside the sites to check ground conditions
- Installation of site sheds, worker facilities and environmental controls
- Removal of any contaminated materials from the premises in accordance with Safe Work and Environmental Protection Authority controls
- Demolition or removal of buildings and structures
- Removal of vegetation and trees within and around the sites
- Piling to install temporary noise barriers and hoarding
- Earthworks and concrete work to level the sites
- Installation of water management infrastructure

Keeping you informed
If you have any enquiries about this work, contact the WestConnex info line on 1800 660 248, email info@rozelleinterchange.com.au or visit westconnex.com.au/projects/m4-m5-link-rozelle-interchange for more information.

You can also visit us in person at our temporary Community Information Centre located at 84 Lilyfield Road, Rozelle, Monday to Friday between the hours of 9.00am and 5.00pm.

Please let us know if you would like to be added to our email contact list.

Notification No.0013

Constructed by
This work will involve oversized deliveries and an increase in construction vehicles to and from the site. Work will mostly take place in our standard construction hours of 7.00am to 6.00pm Monday to Friday and 8.00am to 6.00pm on Saturdays, but some work will need to take place at night. You will be notified in advance about work required outside of standard hours.

Equipment required for this work includes excavators with demolition attachments, bulldozer, road grader, cranes, piling rig, saw cutters, jack hammers, hand tools, elevated working platform, water carts, vacuum trucks, vibratory rollers, asphalting equipment, concrete trucks and pumps, concrete crushers, generators, trucks, lighting towers, traffic control and light vehicles.

How this affects you
At times our work will be noisy and will temporarily impact parking in the local area. The project is committed to limiting these impacts to you by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use, directing noise and light generating equipment away from homes where possible and installing noise blankets around our temporary work areas.

Traffic changes
During work periods, changes to parking, traffic and pedestrian routes around the work sites will be required. Intermittent road closures and short-term removal of on-street parking (within 10 metres of kerbs at street entry) will be required on Hornsey and Gordon streets and Lilyfield Road to enable us to undertake this work. We will notify you regarding road closures and changes to on-street parking in advance. Traffic control and signage will be in place to assist motorists, pedestrians and cyclists through these changes. We sincerely thank you for your patience and apologise in advance for the inconvenience while we carry out this important work.
