

8 February 2017

Installation of ground monitoring equipment - Shaw Street Reserve, Bexley North

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit westconnex.com.au/NewM5.

In order to monitor ground movement during tunnel construction, ground monitoring equipment will be installed in Shaw Street Reserve, Bexley North from **Monday, 13 February 2016**. Installation will take up to 10 days to complete, weather permitting.

Work will take place between **7.00 am and 6.00 pm from Monday to Friday and 8.00 am to 1.00 pm on Saturday**. There will be no work on Sunday or public holidays.

Installation of ground monitoring equipment involve drilling a small diameter hole up to 30 metres below ground and inserting an extensometer.

A temporary worksite with safety fencing will be set up to securely contain the drilling equipment. Property access will be maintained throughout the work. At the completion of work, the site will be restored and the ground monitoring equipment will remain in place. Technicians will revisit the site daily to collect data from the monitoring equipment. Data collection will not require further drilling.

If you have a question or complaint about this work, please call toll free **1800 660 248** and ask to speak to a member of the New M5 community engagement team or email info@newm5.com.au.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
