

27 May 2016

Geotechnical and utilities investigations – Haberfield

Further to our previous notification on 16 March 2016, geotechnical investigations will commence on the Wattle Street between Ramsay Street and Timbrell Drive, Haberfield from **Tuesday, 31 May 2016**. A map of the work locations is provided overleaf.

To minimise impacts to traffic and ensure the safety of workers and motorists, work will take place **between 9.00 pm and 5.00 am from Monday to Friday**. You will be notified if work is required outside of the hours near your property.

The work is expected to take approximately two nights to complete, weather permitting and will involve:

- asphalt investigations to inform the design of the new road pavement
- marking out locations for each borehole
- setting up a safe work area and environmental controls
- identifying underground services and utilities using a vacuum truck
- collecting borehole soil and rock samples using drilling equipment.

These investigations will involve the use of a small excavator or drill rig to locate underground services and confirm ground conditions. Other equipment used during the work will include a concrete saw, vacuum truck and lighting equipment. This work may generate intermittent noise.

Two eastbound lanes on Wattle Street will be closed and traffic arrangement will be in place to ensure the safety of motorists, residents and workers. Please allow extra travel time and follow the direction of traffic controllers and signage. Access to private properties will be maintained at all times.

Every effort will be made to minimise the impact of work, including by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you would like further information about the upcoming work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au. Notification reference: N068

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
