

27 June 2016

Installation of permanent electronic variable message sign - Concord Road, Concord

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

The M4 East will extend the existing M4 from Homebush to Haberfield via underground twin tunnels, each 5.5 kilometres in length and among the widest in the southern hemisphere. They will allow for three lanes of traffic in each direction, saving travel time for motorists and taking traffic off local roads. For more information, visit westconnex.com.au/M4East.

In mid-July, a permanent electronic variable message sign (VMS) will be installed within the road reserve on Concord Road near Napier Street, Concord. A map of the location is provided overleaf.

The VMS will support the efficient operation of the road network by providing real-time information about changes to road conditions such as accidents, weather, unplanned traffic incidents and other unforeseen traffic conditions, as well as planned events.

Throughout the M4 East construction phase, the VMS will be used to communicate up-to-date information about roadworks, changed traffic conditions and disruptions, enabling road users to make informed decisions about their journeys.

This location has been selected with the aim of:

- minimising impacts and providing safe access to properties
- providing sufficient time for road users to read, comprehend and adopt the action in the message
- ensuring it does not conflict with existing road signage
- complying with Roads and Maritime Services specifications.

A works notification will be distributed to residents prior to the commencement of installation works.

If you would like further information about the location of the VMS, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.

Notification reference: N077d

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
