

17 August 2016

M4 Motorway – Night Work

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

The M4 East will extend the existing M4 from Homebush to Haberfield via underground twin tunnels, each 5.5 kilometres in length and among the widest in the southern hemisphere. They will allow for three lanes of traffic in each direction, saving travel time for motorists and taking traffic off local roads. For more information, visit westconnex.com.au/M4East.

From **Monday, 22 August**, preparatory work will commence on the M4 Motorway and Homebush Bay Drive on and off ramps. A map and calendar showing the work area and scheduled dates of activity is provided overleaf. Please note, if the work is unable to be completed over this period, it will be rescheduled.

The following work is expected to take place over two nights, weather permitting, and will occur between **10.30 pm and 5.00 am** to reduce impacts on road users and ensure the safety of workers and motorists:

- tree removal
- barrier relocation
- asphalt core hole testing
- line marking

Equipment used throughout the work will include chainsaws, hammer drills, excavators, grabs, light towers, street sweepers, electric drills, hand spraying and cranes.

Temporary closures to the M4 Motorway will be in place during the night work. Please allow extra travel time and follow the direction of traffic controllers and signage.

There will be some noise associated with this work, however every effort will be made to keep it to a minimum including by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you have a complaint or enquiry about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
