

Parramatta Road Vent Facility, Haberfield

Further to our notification (N164) on 7 February 2017, from **Saturday, 24 June 2017** work will continue to build the Parramatta Road Vent Facility (PRVF), which is located within the Wattle Street Construction Site. A map of the work area is provided overleaf.

Once completed, the PRVF will provide tunnel ventilation for the M4 East Project and future M4-M5 Link. Work to construct the PRVF will be undertaken in two stages. The first stage is bulk earthworks which will be followed by building construction.

In addition to working within standard construction hours, between 7.00 am and 6.00 pm Monday to Friday and 8.00 am and 1.00 pm on Saturday, as outlined in N164. From **Saturday, 24 June 2017** excavation activities will occur between **1.00 pm and 5.00 pm Saturday and 8.00 am and 5.00 pm Sunday** for up to two months (subject to required approval).

Work within the extended hours is expected to take up to 2 months to complete and will include:

- earthworks, including excavation and rock breaking
- tower crane maintenance (20 minutes per weekend).

Equipment used during the extended hours will include two excavators (plus one support excavator), hand tools, generator and lighting equipment.

There will be some noise and vibration associated with this work. Noise and vibration specialists have conservatively predicted a mid-range noise reading at the nearest sensitive receiver during this work. Noise and vibration monitoring will be undertaken throughout the work to ensure compliance with project approvals. Every effort will be made to minimise the impact of work, including turning off equipment and vehicles when not in use and directing noisy equipment away from residences wherever possible.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.

Notification reference: N164A

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
