

Permanent noise wall construction - Dobroyd Parade, Haberfield

From Wednesday, 3 October 2018, work will continue to construct the Dobroyd Parade noise wall. A map highlighting the location of the structure is provided overleaf.

Due to design changes to address utility services, this work is expected to take a month to complete, weather permitting. Residents will be updated about the progress of the work.

What we're doing

What we have achieved:

- installation of approximately 75 posts;
- installation of the noise wall Hebel panels;
- landscaping.

Remaining work will involve:

- auger piling (a quieter form of piling) for the installation of the remaining support posts;
- installation and commencement of painting of remaining Hebel panels;
- remediation of footpaths, driveways and road surfaces;
- finishing landscaping (pending design confirmation).

Equipment used for this work will include an auger piling machine, excavator, cranes, tipper trucks, light vehicles and hand tools.

How this affects you

There will be some noise and vibration associated with this work. Every effort will be made to minimise the impact of work, including managing the staging of work, turning off equipment and vehicles when not in use, and directing noisy equipment away from residences wherever possible.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.
