

## Utility installation work - Dalhousie Street, Haberfield

From Monday, 18 June 2018 work will commence to install utility services on Dalhousie Street, Haberfield. These utilities will service the Intelligent Transport Systems (ITS) infrastructure to be installed on Dalhousie Street. A map showing the location of the work is provided overleaf.

To reduce the amount of out-of-hours work required, parking will be limited near the work site.

### What we're doing

This work will involve:

- underboring
- excavating pits to launch and retrieve machinery
- identifying, relocating and installing utility services.

Equipment used during the work will include excavators, vacuum trucks, concrete saws, boring machines and hand tools.

### What is underboring?

Underboring is a minimal impact method of installing underground pipes, conduits or cables which does not require trenching.

### How this affects you

Where possible, work will be completed within standard construction hours. However, work requiring road or lane closures will need to be undertaken out of hours to ensure the safety of residents, workers and motorists.

There will be some noise associated with this work. Every effort will be made to minimise this by turning off equipment and vehicles when not in use and where possible, directing noisy equipment away from residences.

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. If you travel along the route, please allow extra travel time and follow the direction of traffic controllers and signage.

### When

18 June to 6 July 2018

### Hours of operation

- 7am to 6pm Mon to Fri
- 8pm to 5am Sun to Fri
