

Electricity utility installation – Haberfield

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

The New M4 will extend the existing M4 from Homebush to Haberfield via underground twin tunnels, each 5.5 kilometres in length and among the widest in the southern hemisphere. They will allow for three lanes of traffic in each direction, saving travel time for motorists and taking traffic off local roads. For more information, visit westconnex.com.au/M4East.

From **Monday, 14 August 2017** the New M4 Project will be installing an electrical connection that will provide power to the cut and cover structure at the Parramatta Road Interchange. A map showing the location of the work is provided overleaf.

To minimise the impact to residents, work has been scheduled to take place between **7.00 am and 6.00 pm Monday to Friday** and **8.00 am and 1.00 pm on Saturday**, where possible. However, to ensure the safety of workers and motorists, and due to road occupancy restrictions, some minor night work is required when working close to live traffic on Parramatta Road. Night work will take place between **9.00 pm and 5.00 am Sunday to Friday**. Residents will be notified separately when night work is scheduled to take place and Ausgrid will notify residents affected of any electricity outages.

Work to install the electrical connection will take approximately **one month to complete**, weather and ground conditions permitting, and will include:

- identifying services, excavating and installing cables over approximately four non-consecutive shifts
- temporary restoration work, prior to permanent restoration in consultation with Inner West Council.

Equipment used throughout the work will include vacuum trucks, an excavator, hand tools and lighting equipment.

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers.

Lane closures will be in place on Parramatta Road in the vicinity of night work. If you travel along the work route, please allow extra travel time and follow the direction of traffic controllers and signage.

There will be some noise associated with this work, however every effort will be made to minimise the impact of work, including by using non-tonal reversing beepers on all machinery at night, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the New M4 team or email info@M4East.com.au.

Notification reference: N221

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
