

M4 Widening

July 2015

22 July 2015

Notification of construction of the WestConnex M4 Widening

The Australian and NSW governments are building WestConnex, a 33 kilometre motorway, linking the M4 and M5 motorways for the first time.

Work is underway for the \$500 million WestConnex M4 Widening. The Rizzani Leighton Joint Venture has been contracted to design and build this section of the WestConnex Motorway.

The M4 Motorway will be widened to four lanes in each direction between Church Street, Paramatta and Homebush Bay Drive, Homebush. The works also include a new viaduct from Junction Street, Granville to Church Street, Paramatta and new access ramps from Hill Road, Silverwater and Homebush Bay Drive, Homebush onto the M4 Motorway.

From mid July, construction work will continue at various locations on the M4 Motorway including on and off ramps, between Pitt Street, Parramatta and Homebush Bay Drive, Homebush. This work will include clearing vegetation, site establishment within the median, installing environmental controls, signs and barriers, modifying line marking and removing guard rails. This work has been extended and is due for completion late-August, weather permitting.

We aim to complete the majority of work during the day time to ensure minimal impact on surrounding residents. Generally this work will be carried out between **7am and 6pm, Monday to Friday and 8am to 1pm on Saturdays**, weather permitting. Some work will need to be carried out during the night to ensure the safety of workers and minimise impacts on road users. This night work will be carried out between 8pm to 4:30am, Sunday to Thursday from mid-July to late-August.

Some of this work may be noisy. The Rizzani Leighton Joint Venure will take measures to keep noise to a minimum including carrying out the work no more than three nights in the one location and undertaking regular noise monitoring to ensure levels are being managed effectively.

Equipment used will include a line marking truck, lighting towers, water blaster, grinder, light vehicles, semi-trailers, small cranes, hand tools, chain saws, stump grinders, jack hammers, saw cutters, mulchers and excavators.

Tree clearing (including mulching) will occur outside of standard construction hours at various locations in the median and verge along the motorway. Construction personnel are regularly briefed on measures that will be implemented during night works, and construction activities are closely monitored.

During this night work, temporary traffic diversions, reduced lane and shoulder widths, night-time lane closures and a 40km/hr reduced speed limit will be required. Your patience and cooperation is appreciated while these important works are carried out.

For further information about the works, please visit www.westconnex.com.au, contact the project team on 1300 660 248 (24 hours) or email community.info@rljv.com.au.
