

M4-M5 Link – Geotechnical investigations

The M4-M5 Link is a 7.5 kilometre twin tunnel between the New M4 at Haberfield and New M5 at St Peters.

Roads and Maritime Services is carrying out geotechnical investigations and site inspections to gather information about the ground conditions within the M4-M5 Link project area. We will be working on Grove Street in Lilyfield. We have included a map to show the location of the work.

The work includes drilling boreholes and extracting soil samples using borehole drilling equipment. The work requires light vehicles and a trailer mounted generator. Heavy vehicles will not be used.

Our work Schedule

The investigation work will take up to two weeks to complete between **Monday, 16 July** and **Saturday, 28 July 2018**, weather permitting.

Our work will take place between **7am** and **6pm** from **Monday to Friday** and **8am to 1pm on Saturday**.

How will the work impact you?

The initial works may generate noise associated with drilling, which is similar to the noise created by a small diesel generator. We will continue to do everything we can to minimise noise impact.

Traffic changes and vehicle access

There may be temporary traffic changes during our work hours to ensure the work zone is safe. Pedestrian detours will be managed in association with this work to maintain footpath access.

Lane closures will be in place and may affect travel times. Traffic control and pedestrian management will be in place to ensure the safety of all road users. If you travel along the route, please allow extra travel time and follow the directions of traffic controllers. For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

Some on street parking spaces may be removed to facilitate this work. We apologise in advance for any inconvenience.

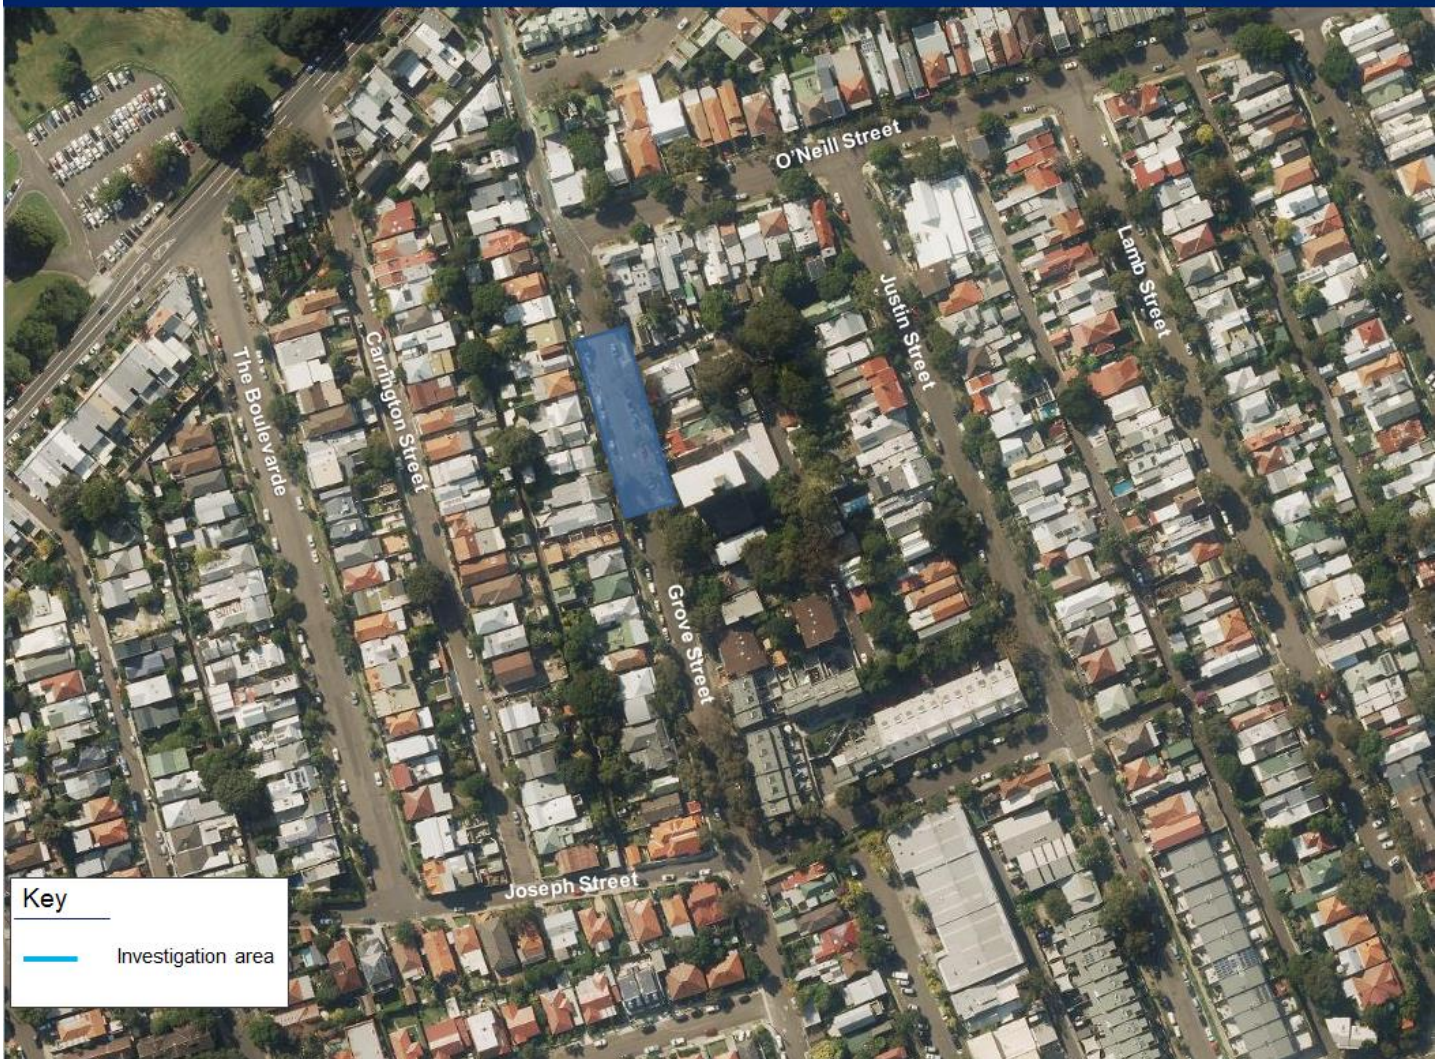

Contact

If you have any questions please call our project team on 1800 660 248 during office hours (8:30am to 5pm Monday to Friday) or email rozelleinterchange@rms.nsw.gov.au.

Thank you for your patience during this important work.
