

Start of work - Wattle Street and Northcote Street tunnelling and civil sites, Haberfield

The existing M4 East Northcote Street tunnelling site and Wattle Street ramps in Haberfield will be used as tunnel and civil sites for the M4-M5 Link Tunnels project from early 2019 to early 2023.

From Monday, 25 February 2019, the M4-M5 Link Tunnels team will start mobilising at the Northcote Street and Wattle Street sites. This is in preparation for tunnelling activities which are planned to start in March 2019.

What we're doing

Site establishment work will take place during standard construction hours **7.00am - 6.00pm Monday to Friday and 8.00am - 6.00pm on Saturdays**. Some work will be required outside of these hours and local residents will be notified in advance.

This work will involve:

- Deliveries of equipment to site during construction hours and oversized deliveries outside of standard construction hours
- Installing steel structures to support tunnelling work
- Installing site fencing, worker facilities and environmental controls

Once the sites are established, tunnelling activities will take place 24 hours a day, 7 days a week. Residents will be notified two weeks in advance of any tunnelling near their property.

How this affects you

Residents will notice an increase in workers around the Haberfield sites over the coming weeks. The M4-M5 Link Tunnel workforce have been advised not to park in the local streets and the project is working to accommodate the starting workforce team at the Parramatta Road East and West sites (formally Muirs), which is currently undergoing site establishment work. Once these sites are established there will be approximately 230 parking spaces for the Northcote and Wattle Street workforce.

This work is expected to generate some noise impacts on nearby residents and we are committed to minimising impacts by:

When

From Monday, 25 February 2019

Hours of operation

7:00am - 6:00pm Monday to Friday

8:00am - 6:00pm Saturdays
