

VMS Installation Work - Waratah Street, Haberfield

Following the recent installation of the Variable Messaging Sign (VMS) structure, from Monday, 17 December 2018 work will commence to attach the face of the sign. A map showing the location of the work is provided overleaf.

Work is expected to take up to two shifts to complete, weather dependent. If work cannot be completed during this time, you will be notified.

What we're doing

Work will involve:

- lifting the VMS sign face into position;
- securing the VMS sign face to the structure.

Equipment used during the work will include a crane, rattle guns, lighting equipment, generators and hand tools.

How this affects you

There will be some noise associated with this work. Every effort will be made to minimise this by turning off equipment and vehicles when not in use and where possible, directing noisy equipment away from residences.

Due to safety requirements for using a crane close to live traffic, this work will be carried out when traffic volumes are lower. Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. Parking may be limited in the vicinity of the work site. If you travel along the route, please allow extra travel time and follow the direction of traffic controllers and signage.

If you have an enquiry or complaint about this work, or would like to receive updates on out of hours work near your property, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.
