

20 July 2016

Installation of noise walls in Holroyd and Granville

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the M4 is being widened between Granville and Homebush from three to four lanes in each direction, alleviating congestion. Visit westconnex.com.au/M4Widening for more information.

From **Tuesday, 26 July 2016**, work will commence to install new noise walls along the M4 Motorway. A map of the noise wall locations is provided overleaf.

This work will take six months to complete, weather permitting, and the majority of this work will be carried out between **7.00 am and 6.00 pm, Monday to Friday and 8.00 am to 1.00 pm on Saturday**. There will be no work on Sundays and public holidays.

This work will involve:

- tree clearing, including wood chipping
- earthworks and drainage works
- piling
- removing and installing noise wall panels.

To ensure the safety of workers and motorists, some work may take place between 6.00 pm and 4.30 am, Sunday to Thursday, and you will be notified of night work in advance.

Equipment used during the work will include cranes, elevated work platforms, piling rigs, concrete pumps, power tools, trucks and lighting towers.

There will be some noise associated with this work, however every effort will be made to minimise the impact of work, including by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you would like further information about the upcoming work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 Widening team.

Notification reference: N073

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
