

## Update to Notification 425 - Night work on Campbell Road, Alexandria

Work has recently been completed to install a new water main the length of Euston Road from Campbell Road to Maddox Street, in order to make improvements to the Sydney Water network. **The first attempt at commissioning the water main was unsuccessful and a second night of work is required.** As this work needs to occur in conjunction with a planned Sydney Water outage, it is being scheduled to occur at night to minimise impact to water users.

### What we're doing

Commissioning works will take place on the night of **Thursday 5 July between 9pm and 5am** at a service pit located on Campbell Road just south of Harber Street.

All work is weather permitting and is scheduled in accordance with Sydney Water requirements. A map showing the location of work and traffic changes in place during the work, is provided overleaf.

Preparation work will be conducted during the daytime to reduce noise at night. Night work will involve the removal of asphalt, excavation of ground, cutting existing Sydney Water assets, making a connection to the newly installed main, and backfilling the ground.

**Sydney Water will directly notify properties that are expected to be impacted by the temporary water outage associated with this work.**

### Traffic changes

All work will take place in the eastbound traffic and parking lane on Campbell Road. **A stop/slow traffic arrangement will be in place on Campbell Road around the work area for the duration of the preparation work and night work.**

Traffic control, signage and reduced speed limits will be in place to assist local residents and road users to navigate around the closure.

### When

Thursday 5 July

### Hours of operation

9pm and 5am (night work)

Notification No.448

Constructed by

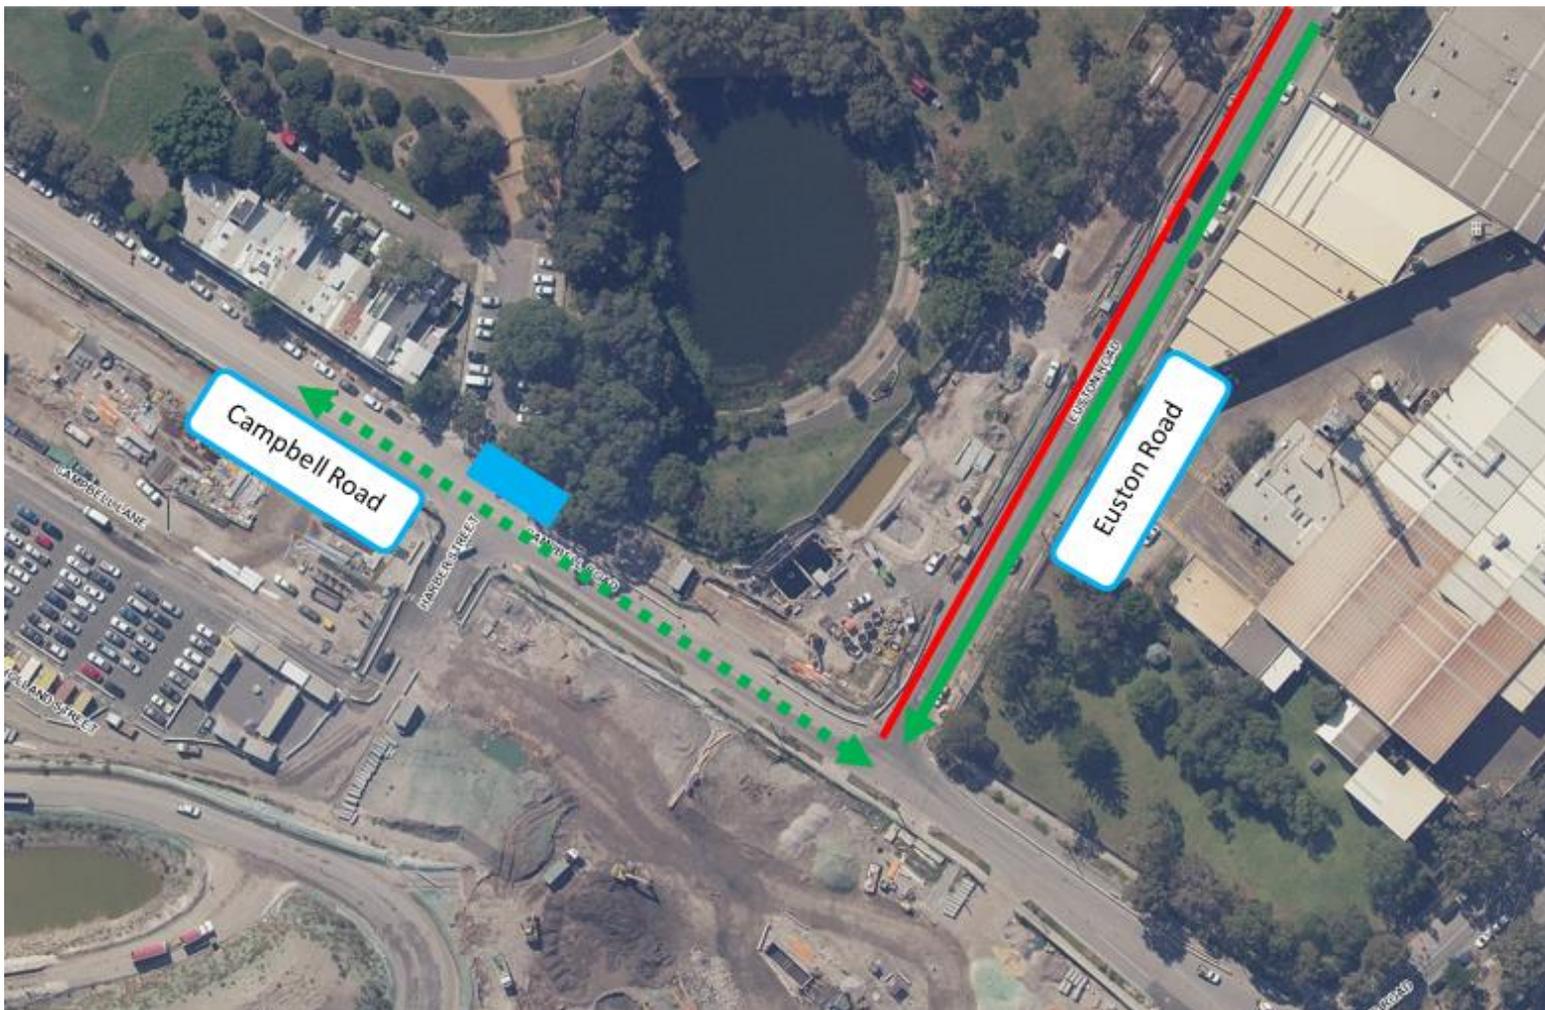

## Minimising impact on residents

The work is expected to create noise (similar to what was experienced on Monday 18 June). Every effort will be made to further minimise noise and light spill associated with this work by:

- Scheduling noisy work to take place early in the night where possible
- Installing noise blankets around the work site
- Turning off equipment and vehicles when not in use
- Using non-tonal reversing beepers on all machinery
- Directing noise generating equipment and lights away from residential properties where possible

Equipment used during the work will include lighting towers, hand tools, vacuum truck, excavator, bucket trucks, saw cutter, generators, traffic management and construction vehicles.
