

New M5 Compliance with Condition B10, September 2016

Condition B10 requires "construction works involving impacts to the listed community (Cooks River/Castlereagh Ironbark Forest) must not commence until the offsets required have been fully identified and evidence provided that they should be achievable".

A report providing evidence of compliance with B10 was submitted to the Department of Planning and Environment on 27 July 2016. The report contains confidential information and as such is not publicly available. DPE subsequently responded on 4 August 2016 confirming that compliance with Condition B10 had been achieved.
