### DICTIONARY

- General Dictionary
Information about this licence

Dictionary
A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee
Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 (“the Act”) and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions
The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence
This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review
The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA
For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).
The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence
The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data
Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:
- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

<table>
<thead>
<tr>
<th>CPB CONTRACTORS PTY LIMITED</th>
</tr>
</thead>
<tbody>
<tr>
<td>PO BOX 6120</td>
</tr>
<tr>
<td>ALEXANDRIA NSW 2015</td>
</tr>
</tbody>
</table>

subject to the conditions which follow.
1 Administrative Conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

<table>
<thead>
<tr>

<td>Road construction</td>
<td>0 - 10 km of road constructed, widened or re-routed</td>
</tr>
</tbody>
</table>

A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

<table>
<thead>
<tr>
<th>Premises Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>WESTCONNEX NEW M5</td>
</tr>
<tr>
<td>BETWEEN BEVERLY HILLS AND ST PETERS</td>
</tr>
<tr>

</tr>
<tr>
<td>NSW 2209</td>
</tr>
<tr>
<td>NEW M5 BETWEEN BEVERLY HILLS TO ST PETERS, INCLUDING SURFACE SITES AT KINGSGROVE NORTH, KINGSGROVE SOUTH, COMMERCIAL ROAD, BEXLEY ROAD NORTH, BEXLEY ROAD SOUTH, BEXLEY ROAD EAST, ARNCLIFFE AND ST PETERS, AS SHOWN IN MAPS REFERRED TO IN CONDITION A2.2</td>
</tr>
</tbody>
</table>

A2.2 In relation to Condition A2.1, the premise is defined by the most recent premise maps held on EPA Electronic File EF16/3654 and approved in writing by the EPA.

A2.3 Premise maps must be available for public access on the project website(s) no more than 3 business days after approval by the EPA.

A3 Information supplied to the EPA

A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:
a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Discharges to Air and Water and Applications to Land

P1 Location of monitoring/discharge points and areas

P1.1 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

P1.2 The following points referred to in the table are identified in this licence for the purposes of the monitoring and/or the setting of limits for discharges of pollutants to water from the point.

<table>
<thead>
<tr>
<th>EPA Identification no.</th>
<th>Type of Monitoring Point</th>
<th>Type of Discharge Point</th>
<th>Location Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>

</tr>
<tr>
<td>2</td>
<td>Construction Water Treatment Discharge</td>
<td></td>
<td>the discharge of construction water associated with tunnelling works during construction at the Kingsgrove North, Commercial Road, Bexley Road North, Amcliffe, Canal Road sites</td>
</tr>
</tbody>
</table>

P1.3 The discharge point referred to in condition P1.2 are active water discharge points from sediment basins and Construction Water Treatment Plants identified in the spreadsheet titled *Temporary Sediment Basin and Construction Water Treatment Plants Discharge Point Schedule* and maintained on electronic file EF16/3654.

P1.4 The licensee must notify the EPA in writing, at least 48 hours prior to a basin or water treatment plant discharge point becoming active or inactive. The notification must include an updated *Temporary Sediment Basin and Construction Water Treatment Plant Discharge Point Schedule.* *(Sediment basins are only considered active whilst accepting water directly from active construction areas).*

P1.5 The following points referred to in the table below are identified in this licence for the purposes of weather and/or noise monitoring and/or setting limits for the emission of noise from the premises.

</tr>
</tbody>
</table>

### 3 Limit Conditions

#### L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

#### L2 Concentration limits

L2.1 For each monitoring/discharge point or utilisation area specified in the table's below (by a point number), the concentration of a pollutant discharged at that point, or applied to that area, must not exceed the concentration limits specified for that pollutant in the table.

L2.2 Where a pH quality limit is specified in the table, the specified percentage of samples must be within the specified ranges.

L2.3 To avoid any doubt, this condition does not authorise the pollution of waters by any pollutant other than those specified in the tables.

#### L2.4 Water and/or Land Concentration Limits

### Point 1

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total suspended solids</td>
<td>milligrams per litre</td>
<td>50</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

L2.5 Exceeding the limits specified in the previous condition of this licence for pH and total suspended solids (TSS) for discharges from the sediment basins, referred to as EPA identification no. 1, identified by Conditions P1.1 and P1.2 is only permitted when the discharge occurs solely as a result of rainfall measured at the premises. The rainfall must exceed rainfall depth value for the corresponding discharge point as described in condition P1.3

L2.6 If the licensee uses turbidity (NTU) in place of TSS to determine compliance with Condition L2.4, the licensee must develop a statistical correlation which identifies the relationship between NTU and TSS for water quality from the discharge points in order to determine the NTU equivalent of 50 mg/L TSS before its use.

L2.7 The EPA may make a written request for a copy of the statistical correlation assessment and methodology to determine compliance with condition L2.4 if required.

L3 Noise limits

L3.1 All works and activities must be undertaken in a manner that will minimise noise and vibration impacts on sensitive receivers.

L3.2 The licensee must ensure that all feasible and reasonable noise and vibration mitigation and management measures are implemented during construction work authorised by this licence in accordance with the Interim Construction Noise Guideline, Department of Environment and Climate Change (DECC) 2009.

L4 Blasting

L4.1 At monitoring locations described in condition P1.5, the airblast overpressure level from blasting operations in or on the premises must not exceed:

a) 115 dB (Lin Peak) for more than 5% of the total number of blasts during each reporting period; and

b) 120 dB((Lin Peak) at any time.
L4.2 At monitoring locations described in condition P1.5, the ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed:
-10 mm/s at sensitive sites, or;
-25 mm/s at non-sensitive sites such as factories and commercial premises, in accordance with the Blast Management Strategy referred to in condition L4.4.

L4.3 Where an agreement has been reached with affected property owners in accordance with the Infrastructure Approval, Condition D36, a maximum airblast overpressure level of 125 dB(Lin Peak) and maximum Peak Particle Velocity vibration level of 25 mm/s shall apply.

L4.4 Blasting must be undertaken in accordance with the most recent "New M5 Blast Management Strategy", document number M5N-ES-PLN-PWD-0041, as approved in writing and held on file EF16/3654 by the EPA.

L4.5 Prior to each blast the licensee must provide the EPA with the location details of the monitoring locations described in Condition P1.5. To remove doubt the update of the monitoring location does not need to occur where the monitoring location has already been notified to the EPA and that there are no changes.

L4.6 Blasts must be limited to an average of one single detonation in any one day, per sensitive receiver, and a maximum of six per week per sensitive receiver, unless expressly permitted by another condition of this licence.
This condition does not apply to blasts that are part of trial blasting.

L4.7 To determine compliance with conditions L4.1, L4.2 and L4.3 airblast overpressure and ground vibration levels must be measured and electronically recorded for monitoring points for the parameters specified in Column 1 of the table below.

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Unit of measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Airblast Overpressure</td>
<td>dB(Lin Peak)</td>
</tr>
<tr>
<td>Ground Vibration Peak Particle Velocity</td>
<td>mm/second</td>
</tr>
</tbody>
</table>

L4.8 A maximum of two detonations may be undertaken in one day at the Arncliffe construction site, provided that:
(a) The detonations occur between chainages 8500 and 7500; and
(b) No sensitive receiver is exposed to noise and vibration impacts from more than two detonations per day; and
(c) No more than twelve detonations per week are undertaken; and
(d) The blasting does not occur outside of the hours of:
   (i) 7am to 6pm Monday to Friday; and
   (ii) 8am to 1pm on Saturdays;
(e) No blasts are undertaken at any time on a Sunday or on a Public Holiday.

L4.9 The operation of Condition L4.8 is subject to review by the EPA after 14 day trial period that commences on 1 December 2017.
L5 **Hours of operation**

L5.1 Unless otherwise specified by any other condition of this licence, construction work is:
(a) restricted to between the hours of 7:00 am and 6:00 pm Monday to Friday;
(b) restricted to between the hours of 8:00 am and 1:00 pm Saturday; and
(c) not to be undertaken on Sundays or Public Holidays.

L5.2 **Work generating high noise impact**

Unless otherwise specified by any other condition of this licence, high noise impact works must only be undertaken:

a) between the hours of 8:00am and 6:00pm Monday to Friday;
b) between the hours of 8:00am and 1:00pm Saturday; and
c) in continuous blocks of no more than 3 hours, with at least a 1 hour respite between each block of work generating high noise impact, where the location of the work is likely to impact the same receivers;

except as expressly permitted by another condition of this licence.

For the purposes of this Condition ‘continuous’ includes any period during which there is less than a 1 hour respite between ceasing and recommencing any of the work the subject of this Condition.

L5.3 Condition L5.2 does not apply to high noise impact work as defined in condition E1.1 (Special Dictionary) when it is generating a predicted and validated LAeq(15 minute) noise level below the highly noise affected level at the most noise effected residences or at other sensitive land uses.

Note: A 5 dB(A) penalty should be factored into the predicted noise levels in the qualitative assessment of high impact work, as stated in Section 4.5 of the ICNG.

L5.4 **Notification of works approved outside of standard construction hours**

a) The licensee must notify potentially affected noise sensitive receivers of works approved outside of standard construction hours not less than 5 days and not more than 14 days before those works are to be undertaken.

b) The notification must be:
- by letterbox drop or email; and
- be detailed on the project website.

c) The notification required by paragraphs (a) and (b) of this condition must:
- clearly outline the reason that the work is required to be undertaken outside the hours specified in Condition L5.1;
- include a diagram that clearly identifies the location of the proposed works in relation to nearby cross streets and local landmarks;
- include details of relevant time restrictions that apply to the proposed works;
- clearly outline, in plain English, the location, nature, scope and duration of the proposed works;
- detail the expected noise impact of the works on noise sensitive receivers;
- clearly state how complaints may be made and additional information obtained; and
- include the number of the telephone complaints line required by Condition M7.1, an after hours contact phone number specific to the works undertaken outside the hours specified in Condition L5.1, and the project website address.
Note: For the avoidance of doubt condition L5.4 does not apply to works undertaken pursuant to condition L5.7 a) or b) or condition L5.11

L5.5 The licensee may undertake works outside of standard construction hours if agreement between the licensee and a substantial majority of potentially affected sensitive receivers has been reached.

L5.6 Any agreement(s) between the licensee and the potentially affected noise sensitive receivers referred to in Condition L5.5 must be recorded in writing and a copy of the agreement(s) kept on the premises by the licensee for the duration of this licence.

L5.7 The licensee may undertake construction work out of hours if that work does not cause:

a) LAeq(15 minute) noise levels no more than 5 dB(A) above rating background level at any residence in accordance with the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009); and
b) LAeq(15 minute) noise levels no more than the noise management levels specified in Table 3 of the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009) at other sensitive receivers; and
(c) continuous or impulsive vibration values, measured at the most affected residence, greater than those for human exposure to vibration, set out for residences in Table 2.2 to the technical guideline ‘Environmental Noise Management Assessing Vibration’ published by the Department of Environment and Conservation in February 2006, and
(d) intermittent vibration values, measured at the most affected residence, greater than those for human exposure to vibration, set out for residences in Table 2.4 to the technical guideline ‘Environmental Noise Management Assessing Vibration’ published by the Department of Environment and Conservation in February 2006.

L5.8 Works Approved Outside of Standard Construction Hours

Activities and works may be undertaken outside of standard construction hours specified in L5.1 but only if one or more of the following applies:
(i) carrying on those works and activities during the hours specified in Condition L5.1 would cause unacceptable risks to one or more of the following:
(1) construction personnel safety;
(2) road user and public safety;
(3) road network operational performance as may be notified from time to time by the Roads and Maritime Services; and/or
(4) essential utility services; and/or
(ii) the TfNSW Transport Management Centre (or other road authority) refuse to issue a road occupancy licence for the works or activities during the hours specified in Condition L5.1.
(iii) Sydney Trains require a Rail Possession (involving week night and/or weekend rail shutdown) for the...
works or activities to be performed;
(iv) The licensee may undertake weekend works outside of standard construction hours along Euston Road between Sydney Park and Harley Street, to carry out works required for the installation of the 132 kV power line along Euston Rd and Mc Evoy Street in St Peters. The works are not undertaken on more than five weekends (total 15 nights) between 16 June and 29 August 2017, provided that:
(a) As far as practicable the noisiest works are scheduled to be undertaken earlier in the night's work;
(b) No more than three consecutive nights of works will be collectively undertaken, and;
(c) A minimum of 2 nights of respite must be provided to the noise affected receivers that are impacted by these works, immediately preceding and following the works allowed by this condition (except for works permitted by conditions L5.5 and L5.7).

L5.9 In undertaking any works or activities under Condition L5.8 the licensee must:
(i) comply with the most recent revision of the 'Manage Environment Noise Issues Procedure', that is held on file and approved in writing by the EPA; and

L5.10 A copy of the 'Manage Environment Noise Issues Procedure' must be available for public access on the project website.

L5.11 The licensee may undertake works outside of standard construction hours if:

(i) the delivery of oversized plant or structures has been determined by the police or other authorised authorities to require special arrangements to transport along public roads; or

(ii) emergency work is required to avoid the loss of lives or property, or to prevent environmental harm.

L5.12 Tunnelling works may be undertaken 24 hours per day, seven days per week provided that works and mitigations are as per the description provided in M5N-ES-RPT-PWD-0011-03- Construction Noise and Vibration Impact Statement: Tunnelling.

L5.13 Tunnel Support Activities may be undertaken at Arncliffe (Kogarah Golf Course), Bexley Road (Bexley South and Bexley North work sites) and Kingsgrove tunnelling sites, 24 hours per day, seven days per week, provided that works and mitigations are as per the descriptions provided in the Construction Noise and Vibration Impact Statements for each site.

L5.14 Works associated with the permanent shafts at the Arncliffe Construction Compound may be undertaken 24 hours per day, seven days per week provided that works are undertaken in accordance with the most recent version of the Construction Noise and Vibration Impact Statement: Arncliffe Permanent Shafts Excavation, which is approved in writing and held on file by the EPA. The licensee must implement monitoring requirements and the procedure to resolve noise exceedances as detailed in this statement.
L5.15 **Euston Road Utility Works - 7-16 January 2018**

The Licensee may undertake works outside of the standard construction hours specified in condition L5.1, to undertake works associated with the installation of DN 500 and DN 150 watermains on the roundabout of Euston Road and Sydney Park Road, provided that:

(a) The works are undertaken between 7 and 16 January 2018 (total of 10 nights).

(b) The works are undertaken as described in the "Construction Noise and Vibration Impact Statement - Euston Road Utility Works" dated 8 December 2017 and prepared by Renzo Tonin.

(c) No works outside standard construction hours that result in noise levels greater than 5 dBA above rating background levels at noise sensitive receivers affected by the works are to occur for 2 nights prior to the works permitted by this conditions and five nights following the works (except for works permitted by conditions L5.5 and L5.7).

(d) As far as practicable, the noisiest works are to be undertaken early in the night.

### 4 Operating Conditions

**O1 Activities must be carried out in a competent manner**

O1.1 Licensed activities must be carried out in a competent manner. This includes:

a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and

b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

**O2 Maintenance of plant and equipment**

O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:

a) must be maintained in a proper and efficient condition; and

b) must be operated in a proper and efficient manner.

**O3 Dust**

O3.1 The licensee must ensure that construction work is carried on by such practicable means as may be necessary to minimise dust emissions on the premises, and implement all feasible and reasonable mitigation measures to minimise the release of dust from the premises.

**O4 Processes and management**

O4.1 The licensee must maximise the diversion of run-on waters from lands upslope and around the site whilst land disturbance activities are being undertaken.
O4.2 The drainage from all areas that will mobilise suspended solids when stormwater runs over these areas must be controlled and diverted through appropriate erosion and sediment control measures.

O4.3 The licensee must minimise the area of the site that is able to generate suspended material when water runs over it.

O4.4 Erosion and sediment controls must be designed (stability, location, type and size), constructed, operated and maintained in accordance with the guideline "Managing Urban Stormwater – Soils and Construction, Volume 2D, Main road construction" DECC 2008, to be read and used in conjunction with volume 1 "Managing urban stormwater: soils and construction" Landcom 2004.

O4.5 The licensee must ensure the design storage capacity of any sediment basin installed on the premises is reinstated within 5 days of the cessation of a rainfall event that causes runoff to occur on or from the premises.

O4.6 The licensee must ensure that sampling point(s) for water discharged from the sediment basin(s) are provided and maintained in an appropriate condition to permit:
   a) the clear identification of each sediment basin and discharge point;
   b) the collection of representative samples of the water discharged from the sediment basin(s); and
   c) access to the sampling point(s) at all times by an authorised officer of the EPA.

O4.7 The licensee must endeavour to maximise the reuse of captured stormwater on the premises.

O4.8 Where sediment basins are necessary, all sediment basins and associated drainage must be installed and commissioned prior to the commencement of any clearing or grubbing works within the catchment area of the sediment basin that may cause sediment to leave the site.
   Note: This condition does not apply to those works associated with the actual installation of sediment basins or associated drainage.

O4.9 The licensee must inspect the operation of all erosion and sediment controls installed on the premises and undertake any works required to repair and/or maintain these controls:
   a) at least weekly during normal construction hours outlined in condition L4.1;
   b) daily during periods of rainfall that causes runoff to occur; and
   c) prior to any site closure of greater than 24 hours.

O4.10 The licensee must record all such inspections, including observations and works undertaken to repair and/or maintain soil and water management works.

O4.11 Community Engagement

   a) The licensee must provide a Community Information Centre within the main Site Office at 25-29 Burrows Road, St Peters, that will be available to the community during business hours. The Community Information Centre must provide images and relevant information on the project and be staffed by a...
Community Liaison Team member to provide answers to any community concerns/enquiries.

b) The community information display must include details of upcoming construction activities (including out of hours activities), nature and timing of such activities and relevant contact details. The information must include at least a minimum, details of up and coming activities that are to occur over the next month.

c) The licensee must convene and hold community meetings or open forums in relation to the project, including (but not limited to) key construction activities and/or key project milestones, at least once every three months.

d) The licensee must keep minutes of any community meeting held in accordance with this condition and must submit a copy of the relevant minutes to the EPA when requested by an EPA officer.

5 Monitoring and Recording Conditions

M1 Monitoring records

M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.

M1.2 All records required to be kept by this licence must be:
   a) in a legible form, or in a form that can readily be reduced to a legible form;
   b) kept for at least 4 years after the monitoring or event to which they relate took place; and
   c) produced in a legible form to any authorised officer of the EPA who asks to see them.

M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
   a) the date(s) on which the sample was taken;
   b) the time(s) at which the sample was collected;
   c) the point at which the sample was taken; and
   d) the name of the person who collected the sample.

M2 Requirement to monitor concentration of pollutants discharged

M2.1 For each monitoring/discharge point or utilisation area specified below (by a point number), the licensee must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The licensee must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

M2.2 Water and/ or Land Monitoring Requirements
### Environment Protection Licence

**M2.3** For the purposes of condition M2.2 and the Table thereto ‘Special Frequency 1’ means:

(a) less than 24 hours prior to a controlled discharge and daily for any continued controlled discharge; and

(b) when rainfall causes a discharge from a basin which has not been emptied within 5 days of the cessation of a rainfall event.

**M3 Testing methods - concentration limits**

**M3.1** Subject to any express provision to the contrary in this licence, monitoring for the concentration of a pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

**M4 Environmental monitoring**

**M4.1** Noise monitoring must be carried out in accordance with Australian Standard AS 2659.1 – 1998: Guide to the use of sound measuring equipment – Portable sound level meters, and the compliance monitoring guidance provided in the NSW Industrial Noise Policy.

**M4.2** Vibration monitoring must be carried out in accordance with the guidance provided in the Environmental Noise Management Assessing Vibration: A Technical Guideline, published by the Department of Environment and Conservation, February 2006.

**M4.3** The licensee must undertake noise and vibration monitoring as directed by an authorised officer of the EPA.
M5 Weather monitoring

M5.1 Rainfall at the premises must be measured and recorded in millimetres per 24 hour period at the same time each day from the time that the site office associated with the activities permitted by this licence is established.

M6 Recording of pollution complaints

M6.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

M6.2 The record must include details of the following:
   a) the date and time of the complaint;
   b) the method by which the complaint was made;
   c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
   d) the nature of the complaint;
   e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
   f) if no action was taken by the licensee, the reasons why no action was taken.

M6.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M6.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M6.5 Daily Complaints Reports

   a) The licensee must submit, by 2:00 pm each business day, a report to the EPA that provides details of all complaints received in relation to construction activities regulated by the licence on the telephone complaints line required by Condition M6.1. The licensee is not required to submit a report on a Saturday, Sunday or public holiday until not later than 2:00 pm on the following weekday that is not a public holiday. The licensee is not required to submit a report for any daily reporting period during which no complaints were received.

   b) The report must:

      (i) be submitted to the email address nominated from time to time by the EPA;

      (ii) include a unique identifier number for each complaint;

      (iii) the details required by condition M6.2;

      (iv) include the date and time, as reported by the complainant, of the event the subject of the complaint;

      (v) include an outline of the work or activity the subject of the complaint; and
(vi) include the complaints received between 12.00 pm on that day and 12.00pm on the previous business
day.

M7 Telephone complaints line
M7.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of
receiving any complaints from members of the public in relation to activities conducted at the premises or
by the vehicle or mobile plant, unless otherwise specified in the licence.

M7.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a
complaints line so that the impacted community knows how to make a complaint.

M7.3 The preceding two conditions do not apply until - the date of the issue of this licence.

M7.4 Noise and Vibration Complaints

a) The licensee must investigate noise and vibration complaints received via the telephone complaints
line from the occupants of dwellings or the management of noise sensitive receivers other than dwellings:

(i) within two hours of the complaint being made; or

(ii) in accordance with any prior complaint management agreement the licensee may have made with the
complainant.

6 Reporting Conditions

R1 Annual return documents
R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

1. a Statement of Compliance,
2. a Monitoring and Complaints Summary,
3. a Statement of Compliance - Licence Conditions,
4. a Statement of Compliance - Load based Fee,
5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan,
6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and

At the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be
completed and returned to the EPA.

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.
Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

R1.3 Where this licence is transferred from the licensee to a new licensee:
   a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
   b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:
   a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
   b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

R1.5 The Annual Return for the reporting period must be supplied to the EPA via eConnect EPA or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.

R1.7 Within the Annual Return, the Statements of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:
   a) the licence holder; or
   b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

R2 Notification of environmental harm

R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

R3 Written report

R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
   a) where this licence applies to premises, an event has occurred at the premises; or
   b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the
carrying out of the activities authorised by this licence,
and the event has caused, is causing or is likely to cause material harm to the environment (whether the
harm occurs on or off premises to which the licence applies), the authorised officer may request a written
report of the event.

R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA
within such time as may be specified in the request.

R3.3 The request may require a report which includes any or all of the following information:

a) the cause, time and duration of the event;

b) the type, volume and concentration of every pollutant discharged as a result of the event;

c) the name, address and business hours telephone number of employees or agents of the licensee, or a
specified class of them, who witnessed the event;

d) the name, address and business hours telephone number of every other person (of whom the licensee
is aware) who witnessed the event, unless the licensee has been unable to obtain that information after
making reasonable effort;

e) action taken by the licensee in relation to the event, including any follow-up contact with any
complainants;

f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of
such an event; and

g) any other relevant matters.

R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not
satisfied with the report provided by the licensee. The licensee must provide such further details to the
EPA within the time specified in the request.

R4 Other reporting conditions

R4.1 Noise and Vibration Reports

a) Upon request of an authorised officer of the EPA, the licensee must submit a Preliminary Investigation
Report to the EPA in respect of any noise or vibration monitoring undertaken in accordance with the
requirements of Condition M7.4.

b) The Preliminary Investigation Report must be submitted to the EPA by 4.30 pm of the afternoon of the
next working day following any noise or vibration monitoring.

c) The Preliminary Investigation Report must:

(i) include numerical and/or graphical representation of the noise and vibration monitoring results; and

(ii) highlight any detected exceedance of noise goals or limits specified in:

(1) this licence;

(2) relevant noise guidelines; and

(3) relevant noise modelling.
d) In the event of any exceedance of the noise goals or limits referred to in Condition R4.2 c)(ii), the licensee must:

(i) modify work practices and methods and implement all practicable and reasonable measures to prevent a recurrence of the exceedance; and

(ii) submit a Follow-up Investigation Report to the EPA within 5 working days of any noise or vibration monitoring having been undertaken (unless otherwise approved by the EPA).

e) the Follow-up Investigation Report must include:

(i) confirmation of whether noise monitoring has been undertaken in accordance with AS2659 and the compliance monitoring guidance provided in the INP;

(ii) confirmation of whether vibration monitoring has been undertaken in accordance with the guidance provided in the Assessing vibration: a technical guideline (DEC, 2006);

(iii) details of the prevailing meteorological conditions during the period when the noise or vibration monitoring was undertaken;

(iv) a map of each noise and vibration monitoring location in relation to the noise source, including relevant distances;

(v) numerical and graphical representation of the noise and vibration monitoring results;

(vi) an analysis of the noise and vibration monitoring results;

(vii) details of any remedial action taken in relation to the matter; and

(viii) in cases not the subject of remedial action, detailed justification of the decision not to undertake remedial action.

7 General Conditions

G1 Copy of licence kept at the premises or plant

G1.1 A copy of this licence must be kept at the premises to which the licence applies.

G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.

G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

G2 Contact number for incidents and responsible employees
G2.1 The licensee must provide the EPA with up to date contact details to enable the EPA:

(a) to contact either the licensee or a representative of the licensee who can respond at all times to incidents relating to the premises, and

(b) to contact the licensee's senior employees or agents authorised at all times to:

(i) speak on behalf of the licensee, and

(ii) provide any information or document required under licence.

G2.2 The contact details required by Condition G2.1 above must include:

a) the full name and title of the authorised representatives and the scope of their respective authorisations; and

b) the direct telephone number, mobile number, pager number, fax number, email address and postal address for contacting each authorised representative.
