

Night work to install road surveillance camera in Bexley

Work will be undertaken in sections of the road corridor at Wollie Avenue and Bexley Road, Bexley to install a surveillance camera. The camera will be used to monitor the movements of trucks entering and exiting the M5 East motorway via Bexley Road. A map showing the location of the work is provided overleaf.

Due to the high traffic volumes on Bexley Road and for the safety of workers, pedestrians and motorists, this work will be carried out over four nights from **Sunday 19 November 2017** (weather permitting). The work will be undertaken between **6.00 pm and 5.00 am**.

The work will include:

- Opening existing communication pits within the road verge at the corner of Wollie Avenue and Bexley Road
- Inserting and connecting cables within conduits under the road at Wollie Avenue
- Installing a bracket and camera on top of the signal post at the existing traffic island near the intersection of Bexley Road and the M5 westbound entrance.

Equipment used during the work will include hand tools, an elevated work platform and light vehicles.

Construction Impacts

Changed traffic conditions, including reduced speed limits, road and lane closures as well as pedestrian detours will be in place during this work. Traffic control and signage will be in place to assist road users through these changed traffic conditions.

Some of this work will be noisy. Noise monitoring will be conducted for all work undertaken outside of standard construction hours.

This work is part of the New M5 project which will duplicate the existing M5 tunnel and double traffic capacity of the M5 East corridor. For more information, visit westconnex.com.au/NewM5.

If you have any complaints or enquiries about this work, please call **1800 660 248** (24 hours) and ask to speak to a member of the New M5 community engagement team or email info@newm5.com.au.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
