

Night work and road closure on Euston Road, Alexandria

Work is currently underway on Euston Road to install low voltage power cable that will eventually feed new street lighting. This work will take place south of Sydney Park Roundabout. This work is required to be undertaken at night under traffic management for the safety of the workers, motorists, pedestrians and cyclists as car volumes are lowest.

What we're doing

A crew will install a new pit within the footpath to connect low voltage electrical cables from Euston Road to Huntley Street. Night work will be undertaken on Monday 30 July, Tuesday 31 July, Wednesday 1 August and Friday 3 August, Weather permitting. Work will occur between 9pm and 5am each night.

Work will involve creating a small hole, installing power conduits, pulling cable through the conduits and backfilling the ground. Saw cutting will be completed during the day to reduce noise.

Minimising impact on residents

Equipment used during the work will include lighting towers, hand tools, vacuum truck, excavator, bucket trucks, generators, traffic management and construction vehicles.

The work is expected to create minimal noise for residents located north of the roundabout on Euston Road. Every effort will be made to further minimise noise and light spill associated with work by:

- Scheduling noisy work to take place early in the night where possible
- Installing noise blankets around the work site
- Saw cutting the trench during daytime hours
- Turning off equipment and vehicles when not in use
- Using non-tonal reversing beepers on all machinery
- Directing noise generating equipment and lights away from residential properties where possible.

BUILDING OUR FUTURE

Constructed by

Traffic changes

Euston Road south of Sydney Park Roundabout will be closed to the wider public each night. Access for local businesses will be maintained. Residents living on Campbell Road are encouraged to use Princes Highway and Barwon Park Road for the duration of this week to avoid the closure.

A map showing the location of the work and the road closures, is provided overleaf.

Traffic control, signage, detours and reduced speed limits will be in place to assist residents and road users to navigate around the closure.
