

Bridge construction work on Gardeners Road, west of Kent Road from Tuesday 12 March for approximately 12 weeks

We are establishing a new work area on Gardeners Road as part of the construction of the new bridge between Gardeners Road and the new St Peters Interchange over the Alexandra Canal.

Piling work will be undertaken within this new work area from Tuesday 12 March and will continue for approximately 12 weeks. Piling work will be carried out on weekdays between 8am and 11am and between 12pm and 3pm, and on Saturdays between 8am and 1pm.

Preparation work, including the delivery of materials will begin on Friday 8 March and be done during standard construction hours.

What we're doing

To construct a safe and solid foundation for the new bridge between Gardeners Road and the St Peters Interchange over the Alexandra Canal, piles must be installed in the ground.

Piles are used to provide solid foundation for construction in softer soil. Piling can result in increased levels of construction noise and vibration. You may feel vibrations from piling activities and hear a low-pitched clanging sound as the hammer drives or vibrates pile liners into the ground.

Every effort will be made to minimise construction impacts, including:

- Monitoring to ensure noise and vibration levels are within allowed limits
- Scheduling an hour-long break for every three hours of piling works
- No piling outside of construction hours or on Sundays

The 20-metre-long concrete piles will be installed with a driven pile driver. A total of 170 piles will be driven in this area over approximately 12 weeks. Work will begin in the area furthest from residents and businesses.

During this work we will also remove the current road pavement which will involve concrete breaking and excavation.

Piling will occur in the area shown on the map overleaf.

When

From Tuesday 12 March for approximately 12 weeks

Weekdays

Morning work: 8am - 11am

Afternoon work: 12pm - 3pm

Saturdays

8am - 11 am and 12pm to 1pm

BUILDING OUR FUTURE

Constructed by

How this affects you

Pile driving work is expected to generate high levels of associated noise and vibrations. An independent vibration specialist has been engaged to ensure compliance with all the relevant regulations.

Work will occur in three-hour blocks with one hour of respite in between.

Equipment used during the work will include cranes, excavators, concrete removal trucks and a piling rig.

If you have any questions about this work, please contact the WestConnex New M5 Community Relations Team at info@newm5.com.au or call 1800 660 248 and ask to speak to a member of the New M5 Community Relations Team.
