Night work on Albert Street St Peters

Utility work will take place on Albert Street to install underground power conduits. This work is scheduled to take place at night to minimise the impact to local business access during day-time operating hours.

What we're doing

From 7pm on Thursday 30 May to 5am on Friday 31 May night work is scheduled to install underground power conduits across one business driveway on Albert Street approximately 50 meters south of Campbell Street (east).

Please see the map overleaf showing the location of this work.

This work will involve trenching across the property driveway, installing power conduits and reinstating the driveway.

There are no traffic changes in connection with this work.

How this affects you

Equipment used during the night work will include an excavator, road saw, vacuum truck, construction vehicles, compaction equipment and hand tools.

This work is expected to generate some noise. Every effort will be made to minimise noise and light spill associated with these works by turning off equipment and vehicles when not in use.

The site compounds on May Street and along Campbell Street and Campbell Road will be used intermittently during the night work shift for storage of materials and vehicle parking.

If you have a question about this work, please call 1800 660 248 (toll free) and ask to speak with a member of the New M5 community engagement team or email info@newm5.com.au.
