

6 July 2017

Night work at Kingsgrove

To continue construction at Kingsgrove, work will be undertaken in sections of the road verge on the M5 East between Kingsgrove Road and King Georges Road. A map showing the location of the work is provided overleaf.

Further to the previous notification, sheet piling work will be undertaken in the eastbound lane of the motorway to support the construction of the tunnel portal structure. This work has been postponed and will now take place from **Monday 10 July 2017 between 6.00 pm and 5.00 am.**

Sheet piling activities will take up to two weeks to complete (weather permitting) and will be undertaken at night due to traffic volumes on the M5 East motorway.

Construction Impacts

Equipment to be used during this work will include trucks, sheet piling rig, excavators, lighting towers and generators.

Some of this work may be noisy, every effort will be made to reduce the impact to residents and businesses while work takes place. Noise monitoring will be conducted for any work that takes place outside of standard hours. Any dust generating activities will be watered down to minimise dust.

During the night work, the M5 East eastbound slow lane will be temporarily closed so that the work can be completed safely. Traffic control and signage will be in place to assist road users through these changed traffic conditions. If you are travelling through the area please allow extra time for your journey and follow the signs and directions from traffic controllers. For the latest traffic information, visit livetraffic.com or download the Live Traffic NSW app.

If you have any complaints or enquiries about this work, please call **1800 660 248** (24 hours) and ask to speak to a member of the New M5 community engagement team.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
