

10 May 2017

Night work on M5 East motorway at Kingsgrove

Night work will be undertaken in sections of the road verge on the M5 East between Kingsgrove Road and King Georges Road.

Due to the high traffic volumes on the M5 East and for the safety of workers and motorists, this work will be carried out over four nights during the existing M5 East maintenance shutdown from **Sunday 14 May 2017**, weather permitting. The work will be undertaken between **6.00 pm and 5.00 am**.

The work to be carried out includes:

- Removing existing concrete safety barriers from the road verge as well as repositioning and adding new barriers
- Installing safety screen guards along barriers
- Removing noise wall panels south of the motorway
- New line markings to set up lanes for site access
- Continuing work on underground utility services
- Installing bollards near site access gates
- Geotechnical drilling and installation of survey device within shared path north of the motorway

Shared path closure

From **Wednesday 17 May 2017**, a section of the shared path near Garema Circuit will be temporarily closed between **10.00 pm and 5.00 am** to facilitate ground drilling and installation of a survey device. This work will be undertaken over two nights to minimise impacts to shared path users during the day.

A temporary worksite with safety fencing will be set up to securely contain the drilling equipment. At the completion of this work, the shared path will be restored to its original condition.

Minimising construction impacts

Equipment to be used during this the work will include trucks, geotechnical drill rig, excavators, lighting towers, concrete cutters, generators, cranes, hand drills, compressors and pumps.

Every effort will be made to reduce the impact to residents and businesses as well as pedestrians and cyclists while work takes place. We will implement reasonable and feasible measures to minimise noise impacts on local residents. Noise monitoring will be conducted for any work that takes place outside of standard hours. Any dust generating activities will be watered down to minimise dust.

Traffic control and signage will be in place to assist road users through these changed traffic conditions.

If you have a complaint or enquiry about this work, please call **1800 660 248** (24 hours) and ask to speak to a member of the New M5 community engagement team.
