

St Peters Interchange and local road upgrades

Welcome to the February construction update for the St Peters Interchange and local road upgrades as part of the WestConnex New M5 project.

Site establishment is now under way along Euston Road between Campbell Road and Sydney Park Road, including work to establish the Euston Road work site between Sydney Park Road and Maddox Street.

The removal of vacant properties within the project footprint, including along Campbell Street/Road and adjoining local roads, is continuing. Work is now starting on establishing the various construction work sites for the road upgrades.

Changed traffic conditions will continue to be in place along Campbell Street/Road throughout February to facilitate the property clearing. Thank you for your ongoing patience during these changes. For up-to-date information about traffic impacts, visit livetraffic.com.

Earthworks continue for the foundations of the new interchange within the former Alexandria landfill.

Tunnelling is also progressing well under the Princes Highway.

Rapid impact compaction at St Peters Interchange site, January 2017

Upcoming activities

St Peters Interchange (former Alexandria Landfill)

- ongoing earthworks, including excavating, moving and compacting material
- continuing construction of the cut and cover tunnel near Canal Road and the Princes Highway, including bored pile installation and concrete pours
- ongoing remediation work to formally close the Alexandria Landfill
- continuing 24-hour tunnelling excavation under the Princes Highway and tunnel support activities
- oversized deliveries to the Canal Road and Albert Street gates outside of standard construction hours.

Local roads in St Peters, Alexandria and Mascot

- permanently reinstating footpaths and roads along the underground power cable route in St Peters
- ongoing clearing of properties within the project footprint, including heritage salvage, tree, vegetation and building removal
- ongoing power adjustment work, which will now continue until March
- starting construction of temporary noise walls along the project boundary on Campbell Street
- temporary changed traffic conditions to facilitate property clearing, including a westbound lane closure on Campbell Street and Campbell Road between Unwins Bridge Road and Burrows Road
- utility investigations, geotechnical investigations and surveys inside the construction boundary on Euston Road
- continuing fencing and barrier placement along Euston Road north of Sydney Park Road, with changes to the footpath and parking
- continuing geotechnical and utility investigations in the vicinity of the local road upgrades to inform the detailed design.

Managing hazardous material–

It is common to find hazardous materials in older buildings. Prior to the removal of vacant buildings, the team undertakes activities to identify and remove any hazardous materials such as lead, asbestos, Polychlorinated Biphenyls (PCBs) and synthetic mineral fibres.

Hazardous material removal is now complete for all properties along Campbell Street, St Peters. During this process air quality monitoring for asbestos and lead was undertaken by independent accredited specialists and testing performed by a NATA accredited laboratory. During this work, there have been no instances of airborne particles recorded above the set limits.

The New M5 project works with the Environment Protection Authority (EPA) and SafeWork NSW to ensure management and removal of hazardous materials is carried out in accordance with relevant environmental and health obligations, and legislative requirements for the protection of the community and our workers.

Work hours

New M5 work will generally be carried out during standard construction hours **between 7am and 6pm from Monday to Friday and 8am and 1pm on Saturday**. There will be no work on Sunday or public holidays unless notified otherwise.

Some activities may be undertaken outside standard construction hours, including monitoring by security personnel and workers, and construction vehicles accessing construction sites. These activities are generally inaudible.

Night work will be intermittently required for the safety of workers and motorists and will be undertaken **between 8pm and 5am from Monday to Friday**.

Ausgrid work

Ausgrid is also installing new underground cables in the area and will be working on Burrows Road, Campbell Road and Euston Road until the end of March 2017.

Ausgrid's work will impact traffic and parking on Euston Road and Sydney Park, including the complete closure of the Sydney Park Oval car park and the closure of Euston Road to traffic in a northbound direction, between Campbell Road and Sydney Park Road. For further information about this work please call Ausgrid on 1800 604 765 or email majorprojects@ausgrid.com.au

Temporary traffic changes

Temporary traffic changes, including road and lane closures, footpath closures and detours, reduced speed limits and temporary removal of street parking, will be required to safely complete some activities. Traffic control and signage will be in place to guide motorists, pedestrians and cyclists through any changed traffic conditions.

To facilitate property clearing work, changed traffic conditions will continue to be in place on Campbell Street and the Princes Highway **until late February 2017**. For the latest traffic information visit livetraffic.com.

For more information

If you have any questions about this work, please call toll free **1800 660 248** and ask to speak to a member of the New M5 community engagement team. Alternatively, you can visit the Community Information Centre opened at **27 Burrows Road, St Peters**.

The centre is open on Monday to Friday from 9am to 5pm. You can also subscribe to receive email updates at westconnex.com.au/subscribe
