

Sustainability Policy

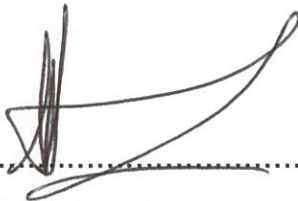

The CPB Dragados Samsung Joint Venture (CDSJV) is committed to integrating governance, environmental, social and economic considerations into decision-making processes within the design and construction stages of the project.

CDSJV staff, including subcontractors and suppliers, will be empowered to, and held to account for, enhancing positive environmental, social and economic outcomes wherever possible, while minimising adverse impacts, resource use and embodied impacts.

CDSJV is committed to minimising impact on the environment and the community and delivering value for money through the following:

- Demonstrating sustainability leadership in infrastructure.
- Building in resilience to potential climate change impacts.
- Minimising land take requirements for both permanent and temporary works.
- Improving amenity through road and urban design.
- Minimising materials use and waste through the Project life-cycle.
- Minimising pollution and environmental harm.
- Influencing contractors, subcontractors and suppliers to adopt sustainable practices.
- Achieving Excellent ratings under the ISCA IS Rating Tool for Design and As-Built.
- Drawing on international best practice through global industry and professional networks.
- Periodically reviewing and evaluating the CDSJV sustainability policy and management systems to ensure continual improvement.
