

Policy Sustainability

Effective July 2018

The Lendlease Samsung Bouygues Joint Venture (LSBJV) makes a commitment to adopt environmental, social and economic sustainability principles as we undertake our commercial activity on the WestConnex M4-M5 Link Mainline Tunnels project (the Project). We support initiatives which go beyond mitigating negative impacts to achieve net positive benefits for society and the environment and to deliver lasting value for the project's stakeholders.

In implementing this policy, our objectives are to:

- Achieve the Client sustainability targets as they apply to our scope of works, to address social, environmental and economic priorities through our Sustainability Plan
- Achieve a certified 'Excellent' Design and As Built Infrastructure Sustainability (IS) Rating under the Infrastructure Sustainability Council of Australia (ISCA) IS Rating scheme
- Assess climate change risks and identify appropriate resilience measures to build road infrastructure that prepares for the challenges presented by climate change
- Encourage a culture of continuous improvement by regularly reviewing and critically assessing progress against our sustainability commitments
- Implement innovative solutions in sustainable design and construction
- Develop the knowledge, awareness and skills of our employees in relation to sustainability requirements and practices
- Engage with the Client, the communities we work within and other stakeholders on sustainability
- Undertake initiatives to enhance environmental and social values within our workforce and community
- Apply sustainable procurement processes that consider environmental, social and economic aspects
- Implement processes to monitor and minimise material, energy and water use throughout the project life cycle
- Ensure the application of sustainable procurement processes to ensure that we are acting ethically and with integrity in all our business relationships
- Collaborate with our supply chain to achieve best practice sustainability outcomes in our workforce and the products and services we procure
- Undertake annual public reporting of sustainability performance and make this policy publicly available for stakeholders
