## Additional temporary noise barrier - Arncliffe construction compound

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit [westconnex.com.au/NewM5](http://westconnex.com.au/NewM5).

Excavation at the Arncliffe compound is required for the construction of the ventilation shafts. In order to mitigate construction noise, an additional temporary noise barrier, made up of shipping containers, will be assembled at the compound next to the Marsh Street boundary. Please see location overleaf. This additional noise barrier will reduce the noise impact from construction of the shafts to surrounding residents.

The noise barrier will consist of five (5) shipping containers in height and ten (10) containers in length. Three (3) rows of containers will be visible above the existing noise wall (about eight (8) metres above the wall). Each container measures 2.6m high, 2.5m wide and 10m long.

This noise barrier will remain in place for approximately eighteen (18) months.

This noise barrier amongst other noise mitigation measures will allow us to undertake excavation work out of hours. Once the noise barrier is installed, excavation work will commence.

**Please provide us with any feedback you may have about this additional noise barrier** by calling us on 1800 660 248 (ask to speak to a member of the New M5 team) or emailing us at [info@newm5.com.au](mailto:info@newm5.com.au) by 16 June 2017.

Alternatively, you can visit the New M5 Community Information Centre which is open 9am – 5pm (Monday to Friday) at 27 Burrows Road, St Peters.

Notification no: 228

### ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
