

## Traffic impacts on Campbell Road (east), St Peters

The New M5 Project has been progressively installing a new 132kv electricity cable along Euston Road as part of the road widening. The cable comes from the substation located on Burrows Road and extends the length of Euston Road/McEvoy Street to a substation in Waterloo.

Work is required to connect the cable into an existing electrical pit located on Campbell Road between Euston Road and Burrows Road.

The pit which will need to be fully opened in order to safely work within, is located within the eastbound traffic lane on Campbell Road. The crew will need to create a trench, construct a new connection point for the conduits and backfill the ground.

## Ongoing Traffic impacts

In order to safely perform this work, **Campbell Road (east) between Euston Road and Burrows Road will be reduced to eastbound traffic only, from Monday 4 September 2017**. Closure of the westbound traffic lane will be in place for approximately 8 weeks, weather permitting. This will mean:

- No left turn into Campbell Road from Burrows Road northbound
- No right turn into Campbell Road from Burrows Road southbound

Traffic control, signage and detours will be in place to guide motorists through the changed traffic conditions.

A map showing the location of the closure is provided overleaf.

## Night work

Night work will be required to establish the work site around the pit on Campbell Road. Concrete barriers will be placed along the road to delineate a safe working area. A crane and a forklift will be used to move the concrete barriers from the truck onto the road.

Night work to install the barriers will take place on **Monday 4 September and Tuesday 5 September 2017, weather permitting**. Work will take place between the hours of **9pm and 6am**.

There will be a full road closure of Campbell Road between Euston Road and Burrows Road whilst the barriers are installed and the work area established. Residents should use Princes Highway or Barwon Park road to access Campbell Road (east). Motorists will be required to follow the designated detour.

## Minimising community impact

Due to the location of work on Campbell Road, residents are not expected to be impacted by noise from the night work.

Every effort will be made to minimise the impact of associated noise by:

- Scheduling noisy work to take place earlier in the night, or on limited nights, where possible
- Turning off equipment and vehicles when not in use
- Using non-tonal reversing beepers on all machinery
