

14 March 2017

Night work on the M5 East at Kingsgrove

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit westconnex.com.au/NewM5.

To continue construction at Kingsgrove, work will be undertaken in sections of the road verge on the M5 East between Kingsgrove Road and King Georges Road. A map showing the location of the work is provided overleaf.

Due to the high traffic volumes on the M5 East and for the safety of workers and motorists, this work will be carried out over four nights during the existing M5 East maintenance shutdown period from **Sunday 19 March 2017** (weather permitting). The work will be undertaken between **6.00 pm and 5.00 am**.

The work to be carried out includes:

- Removing existing concrete safety barriers from the road verge as well as repositioning and adding new barriers
- Installing safety screen guards along barriers
- New line markings to set up lanes for site access
- Continuing work on underground utility services
- Installing bollards near site access gates
- Surface drilling in the eastbound lane of the motorway

Equipment to be used during this work will include trucks, excavators, lighting towers, concrete cutters, generators, cranes, hand drills, compressors and pumps. Every effort will be made to minimise the impact of this work on nearby residents and businesses.

Traffic control and signage will be in place to assist road users through these changed traffic conditions.

If you have a complaint or enquiry about this work, please call **1800 660 248** (24 hours) and ask to speak to a member of the New M5 community engagement team.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
