

**11 August 2016**

## **Geotechnical and utility investigations at Camdenville Basin**

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit [westconnex.com.au/NewM5](http://westconnex.com.au/NewM5).

**From Wednesday 17 August 2016**, geotechnical and utility investigations will be undertaken within the fenced area of Camdenville Basin to assist the detailed design process. Please see overleaf for a map showing the location of these works.

These investigations will be undertaken intermittently for approximately two months, weather permitting.

The work will take place between **7.00am and 6.00pm from Monday to Friday and 8.00am to 1.00pm on Saturday**. There will be no work on Sunday or public holidays.

Geotechnical investigations involve drilling small diameter holes up to 40 metres below ground to confirm underground rock types and ground conditions.

Utility investigations will involve identifying existing underground utility services using high pressure water from a vacuum truck.

At the completion of work, the site will be restored to its original condition.

If you have a question or complaint about this work, please call toll-free 1800 660 248 and ask to speak to a member of the New M5 community engagement team or email [info@newm5.com.au](mailto:info@newm5.com.au).

### **ABOUT WESTCONNEX**

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
