

ITS Work - Dalhousie Street, Haberfield

From Wednesday, 28 November 2018 work will continue for the finalisation of the ITS infrastructure on Dalhousie Street, Haberfield. This work will include installing sensors within the road surface which feed information to the Over Height Detectors (OHDs). A map showing the location of the work is provided overleaf.

OHD's detect oversized vehicles, providing advanced warning that they should not enter the tunnel.

Please note that parking will be limited in the vicinity of the work site. This will allow work to be carried out during the day.

What we're doing

Work will involve:

- Installing the remaining OHD;
- Saw cutting the road surface and installing the sensors.

Equipment used during the work will include concrete saws, power tools and hand tools.

How this affects you

There will be some noise associated with this work and every effort will be made to minimise this by turning off equipment and vehicles when not in use and where possible, directing noisy equipment away from residences. Respite will also be applied to high impact equipment.

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. If you travel along the route, please allow extra travel time and follow the direction of traffic controllers and signage.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.
