

7 September 2016

Soil removal work - Arthur Street, Granville

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the M4 is being widened between Granville and Homebush from three to four lanes in each direction, alleviating congestion. Visit westconnex.com.au/M4Widening for more information.

Further to our notification on 21 July 2016, work is continuing to remove contaminated soil some of which contains asbestos. The presence of asbestos and other contaminated materials within the project boundary were identified in the project's Environmental Impact Statement (EIS). A map of the work area and designed construction route is provided overleaf.

This work will be carried out between **7.00 am and 6.00 pm, Monday to Friday and 8.00 am to 1.00 pm on Saturday**, weather permitting.

Rigorous controls including air quality monitoring, a hygienist being on site to monitor and control the asbestos removal and water sprays to suppress dust will be implemented as identified in the Construction Environmental Management Plan and Workplace Health and Safety Management Plan.

Work to remove contaminated soil will also comply with the NSW Environment Protection Authority's Waste Guidelines and SafeWork NSW Regulations.

More information on asbestos removal is available in the 'Management of contaminated spoil' fact sheet at westconnex.com.au/M4Widening. General information about asbestos is available at safework.nsw.gov.au/health-and-safety/safety-topics-a-z/asbestos.

If you would like further information about the upcoming work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 Widening team.

Notification reference: N079

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
