

2 September 2016

Test piling at the St Peters Interchange construction site

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit westconnex.com.au/NewM5.

Site establishment work is well underway at the former Alexandria Landfill site, and piling works to test the piling methodology for construction of the interchange will commence on **Thursday, 8 September**. This work will take up to **two weeks** to complete, weather permitting.

Piling will be carried out between **8am and 6pm from Monday to Friday and 8am and 1pm on Saturdays**. There will be no work on Sundays and public holidays.

What to expect from piling?

Piles are used to provide solid foundation for construction in softer soil. Piling can result in increased levels of construction noise and vibration. You may feel slight vibrations from piling activities and a low pitched sound as the hammer drives or vibrates pile liners into the ground.

Every effort will be made to minimise construction impacts, including:

- Monitoring to ensure noise and vibration levels are within allowed limits
- Scheduling an hour-long break for every three hours of piling works
- No piling outside of construction hours and on Sundays

For more information

If you would like more information regarding piling activities or have any questions about this work, please call toll free **1800 660 248** (24 hours) and ask to speak to a member of the New M5 community engagement team.

Notification No. 117

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
