

20 July 2016

Underground power cable installation – St Peters

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

As part of the project, the New M5 will duplicate the existing M5 East corridor, doubling vehicle capacity and easing congestion between St Peters and Beverly Hills. It will include twin tunnels, an upgrade of King Georges Road Interchange and a new interchange at St Peters. For more information, visit westconnex.com.au/NewM5.

Work to install underground power cabling from St Peters to the New M5 construction site at the corner of Canal Road and the Princes Highway will commence from **Monday 25 July 2016**. This work will take around 12 weeks to complete, weather permitting, and will be undertaken by electrical contractor Poles and Underground. A map showing the work area is provided overleaf.

The work will be conducted simultaneously:

- In the footpath along the northern side of Unwins Bridge Road between Campbell Street and Silver Street (work area 1)
- In the footpath along the eastern side of Silver Street between Unwins Bridge Road and Edith Lane (work area 2)
- Along Edith Lane, Edith Street, Roberts Street, Roberts Lane and Mary Street (work area 3)
- Across the Princes Highway between Silver Street and Edith Street (work area 4).

Work will generally take place between **7.00 am and 6.00 pm from Monday to Friday and 8.00 am and 1.00 pm on Saturday**. Due to high traffic volumes, work on the Princes Highway and Unwins Bridge Road may need to also take place between **8.00 pm and 5.00 am from Monday to Friday**. You will be notified if night work is to be undertaken near your property. Wherever possible, noisy work will be completed early in the night. No work will be carried out on Sunday and public holidays.

The work will involve:

- Underground utilities investigations
- Trimming and removing vegetation
- Excavating and trenching the road, footpath or verge using excavators, trucks, water carts and other equipment
- Installing plastic ducts and pulling in and connecting power cables
- Ongoing traffic and pedestrian management to ensure the safety of motorists, residents and workers.

Access to property driveways may be limited for short periods as work moves along the route. You will be notified before any access changes occur. Additional information about access and parking is provided overleaf.

The work areas will be reinstated to their original condition once the power supply is connected to the construction site. You will be notified before these reinstatement works commence.

If you have any questions or complaints about this work, please call toll free 1800 660 248 (24 hours) and ask to speak to a member of the New M5 community engagement team.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.

Location of underground cable installation in St Peters

Property access

Driveway access may be limited at some locations for short periods as work moves along the route. You will be notified if the works impact access to your property.

Street parking

Street parking on Unwins Bridge Road, Edith Lane, Edith Street, Roberts Lane, Bakers Lane and Mary Street will be temporarily unavailable during the work. Sections of street parking, roughly 100 metres in length, along both sides of Silver Street will be temporarily unavailable. Traffic controllers will mark-off these areas before works commence. To ensure the work is completed as quickly as possible, please move any vehicles in the proposed work area as required.

Temporary road closures

Temporary road closures will be required on Edith Lane, Edith Street, Bakers Lane and Florence Street at the intersection with Silver Street. Detour signage will be in place during these closures.

Traffic control

Traffic control will be in place along the route during the work, including lane closures and reduced speed limits. Where footpaths are closed, signage will be used to direct pedestrians to the other side of the street. If you travel along the work route, please follow the direction of traffic controllers and signage.
